Gup,2002-09-30 The basic functions of banking lending deposit taking and making payments are constant What changes are the forms banking takes in response to increases in competition globalization new laws and emerging technologies Among the most visible of these changes will be an increase in the consolidation and globalization of banking in the world's major trading countries Now prestigious academics and practitioners including regulators from around the world join Benton E Gup in exploring these coming changes and by doing so define a global perspective on banking's future They find that the consolidation of banking

will persist on a global scale Electronic banking in all its forms will increase in importance and banking in mature economies will be even more different from what it is now in developing economies While focusing on the financial system in the United States Gup's panel of contributors also explores financial systems in Europe Asia and elsewhere Like Gup they predict that a small handful of very large banks will control a disproportionate share of bank assets Their views provide an unusual survey of current thinking in the domains of banking and finance and an important source of current information background and foresights for banking and finance practitioners students and academics *The city guide for Tokyo (Japan)* YouGuide Ltd,
