personal data without their approval If regulators don't force banks to become more transparent consumers certainly will Banks continue to torture customers with push marketing techniques based on models with declining response rates whilst ignoring the customers trying to buy across disconnected channels Meanwhile new lean non bank competitors stalk banks offering consumers compelling experiences by leveraging the new technology a superior understanding of consumers needs as they are not hindered by legacy product or channel based thinking and better use of data However all is not lost for traditional banks that have lost relevance to their customers Banking In search of relevance outlines a new model to help regain relevance in the customer's eyes and discuss how banks might survive the impact of the consumer and technology shockwave The book will appeal to any executive running a multi channel financial services business either B2C or B2B
