Practicing librarians and library educators demonstrate the power of inquiry to achieve the Common Core State Standards CCSS and promote school librarians as key partners in implementing this type of critical teaching and learning in K-12 schools. With the adoption of the CCSS in most of the nation's schools, educators and administrators at K-12 schools have a pressing need to find the best ways to implement these rigorous and comprehensive standards that challenge students to understand informational text and digital content at increasing levels of complexity. This text provides faculty with much-needed support in achieving this critical goal, thoroughly describing inquiry learning and how it links to the CCSS. The authors, nearly 30 contributors total, comprising librarians, library media specialists, educational leaders, teachers from the kindergarten level to college professors and administrators, each with direct experience and knowledge regarding the subject matter, explain how the standards' emphasis on in-depth investigation and evidence-based reading and writing skills dovetail perfectly with inquiry-based learning initiatives. Acclaimed thought leaders such as Jean

Donham Kristin Fontischiaro Leslie Maniotes and Barbara Stripling clearly define and illuminate the librarian's role in school initiatives today and share lesson plans that have been proven effective in actual practice **Think Tank Library** Mary Boyd Ratzer, Paige Jaeger, 2015-01-22 Transform your library into a think tank by helping teachers create an active learning environment in which students question investigate synthesize conclude and present information based on Common Core standards The rigors of today's mandated academic standards can repurpose your library's role as a steward of the Common Core State Standards CCSS at your school Created for teachers of grades 6 through 12 this guide will help you help present exciting field tested lessons that address developmental steps and individual differences in key competencies in the CCSS Authors and educators Mary Ratzer and Paige Jaeger illustrate how brain based learning helps students become deep critical thinkers and provide the lesson plans to coax the best thinking out of each child This tool book presents strategies to help learners progress from novice to expert thinker challenge students with questions that lead to inquiry incorporate rigor into lessons and use model lesson plans to change instruction Beginning chapters introduce the basics of instruction and provide ideas for expert cognitive growth of the brain Sample lessons are aligned with key curriculum areas including science social studies music art and physical education **Supporting Reading in Grades 6-12** Sybil M.
