Brown, 2006-04-01 This collection charts the terrain of contemporary Japanese animation one of the most explosive forms of visual culture to emerge at the crossroads of transnational cultural production in the last twenty five years The essays offer bold and insightful engagement with anim s concerns with gender identity anxieties about body mutation and technological monstrosity and apocalyptic fantasies of the end of history The contributors dismantle the distinction between high and low culture and offer compelling arguments for the value and importance of the study of anim and popular culture as a key link in the translation from the local to the global *Historical Dictionary of Japanese Cinema* Jasper Sharp, 2011-10-13 The cinema of Japan predates that of Russia China and India and it has been able to sustain itself without outside assistance for over a century Japanese cinema s long history of production and considerable output has seen films made in a variety of genres including melodramas romances gangster movies samurai movies musicals horror films and monster films It has also produced some of the most famous names in the history of cinema Akira Kurosawa Hayao Miyazaki Beat Takeshi Toshir Mifune Godzilla The Ring Akira Rashomon and Seven Samurai The Historical Dictionary of Japanese Cinema is an introduction to and overview of the long history of Japanese cinema It aims to provide an entry point for those with little or no familiarity with the subject while it is organized so that scholars in the field will also be able to use it to find specific information This is done through a detailed chronology an introductory essay and appendixes of films film studios directors and performers The cross referenced dictionary entries cover key films genres studios directors performers and other individuals This book is an excellent access point for students researchers and anyone wanting to know more about Japanese cinema *Japanese Cinema in the Digital Age* Mitsuyo Wada-Marciano, 2012-05-31 Digital technology has transformed cinema s production distribution and consumption patterns and pushed contemporary cinema toward increasingly global markets In the case of Japanese cinema a once moribund industry has been revitalized as regional genres such as anime and Japanese horror now challenge Hollywood s preeminence in global cinema In her rigorous investigations of J horror personal documentary anime and ethnic cinema Mitsuyo Wada Marciano deliberates on the role of the transnational in bringing to the mainstream what were formerly marginal B movie genres She argues persuasively that convergence culture which these films represent constitutes Japan s response to the variegated flows of global economics and culture With its timely analysis

of new modes of production emerging from the struggles of Japanese filmmakers and animators to finance and market their work in a post studio era this book holds critical implications for the future of other national cinemas fighting to remain viable in a global marketplace As academics in film and media studies prepare a wholesale shift toward a transnational perspective of film Wada Marciano cautions against jettisoning the entire national cinema paradigm Discussing the technological advances and the new cinematic flows of consumption she demonstrates that while contemporary Japanese film on the one hand expresses the transnational as an object of desire i e a form of total cosmopolitanism on the other hand that desire is indeed inseparable from Japan s national identity Drawing on a substantial number of interviews with auteur directors such as Kore eda Hirokazu Kurosawa Kiyoshi and Kawase Naomi and incisive analysis of select film texts this compelling original work challenges the presumption that Hollywood is the only authentically global cinema

The Anime Machine Thomas Lamarre, 2013-11-30 Despite the longevity of animation and its significance within the history of cinema film theorists have focused on live action motion pictures and largely ignored hand drawn and computer generated movies Thomas Lamarre contends that the history techniques and complex visual language of animation particularly Japanese animation demands serious and sustained engagement and in *The Anime Machine* he lays the foundation for a new critical theory for reading Japanese animation showing how anime fundamentally differs from other visual media *The Anime Machine* defines the visual characteristics of anime and the meanings generated by those specifically animetic effects the multiplanar image the distributive field of vision exploded projection modulation and other techniques of character animation through close analysis of major films and television series studios animators and directors as well as Japanese theories of animation Lamarre first addresses the technology of anime the cells on which the images are drawn the animation stand at which the animator works the layers of drawings in a frame the techniques of drawing and blurring lines how characters are made to move He then examines foundational works of anime including the films and television series of Miyazaki Hayao and Anno Hideaki the multimedia art of Murakami Takashi and CLAMP's manga and anime adaptations to illuminate the profound connections between animators characters spectators and technology Working at the intersection of the philosophy of technology and the history of thought Lamarre explores how anime and its related media entail material orientations and demonstrates concretely how the animetic machine encourages a specific approach to thinking about technology and opens new ways for understanding our place in the technologized world around us
