

La Préparation des commandes

La collecte globale pilotée ou non par informatique permet un véritable auto contrôle.

La préparation semi-automatique, très répandue permet une bonne productivité lorsque le nombre de préparation est important.

Les automates de préparations automatiques permettent des préparations très rapides par vagues, mais restent réservées à des petits produits.

Il en découle que **repérer** suppose de gérer efficacement les emplacements pour permettre au préparateur de s'orienter (gestion de l'adressage), **reconnaître** signifie que le produit puisse être identifié sans équivoque et **prélever** indique que l'opération de « cueillette » est fondamentale de la préparation qui doit s'effectuer avec le minimum d'effort.
