The Wright Brothers

When you hear a plane fly overhead, it may not seem like a big deal, but just over 100 years ago, airplanes were a novel idea.

Wilbur Wright was born on April 16, 1867. On August 19, 1871, his little brother Orville Wright was born. The pair paved the way for human flight.

When the two boys were young, their father brought home a toy "helicopter" for Orville and Wilbur. The foot-long toy was made of paper, bamboo, cork, and a rubber band. When the toy broke, Wilbur and Orville built their own. Building the toy interested them in flying.

The two boys opened a bicycle shop in 1892, but still remained interested in aviation. Wilbur began creating plans based on observations of birds and the work of other scientists. The Wright Brothers began testing their theories about flight with kites. Finally, the brothers traveled from Ohio to Kitty Hawk, North Carolina because the wind would be perfect for testing their new glider. On December 17, 1903, Orville piloted the Wright Flyer to the world's first controlled, powered human flight. Orville and Wilbur Wright proved that humans could fly in airplanes!

Who piloted the first successful flight?

What spurred the Wrights' interest in flight?

Where did they test their new glider?

Why did they take the glider to Kitty Hawk?

How did Wilbur get ideas for his plans?

When did the Wrights open their bike shop?

All Subjects in Play: Play-Based Lessons for the Secondary Classroom Amy Heusterberg-Richards, 2025-03-31 Even older students can benefit from play in the classroom, and it doesn't mean sacrificing rigor. Seasoned educator Amy Heusterberg-Richards shows teachers how embracing play in secondary classrooms can build content, refine skills, and assess understanding, all while inviting joy back into the classrooms of teens who often feel anxious and disfranchised about education. This book describes approaches and rationale for embedding play within secondary classrooms across all disciplines. Each of the 20 lessons includes research-based rationales, step-by-step instructions, samples, student-facing directions, and applications across subject areas. Artificial intelligence (AI) incorporated ideas are also provided. In a world with apathy and AI education, even at the secondary level, needs to embrace the ever-natural, always cathartic experience of playing. By thoughtfully integrating play-based learning, we can enhance classroom management, maintain academic standards, cover the curriculum effectively, and engage older students in meaningful ways. High school learners, too, can laugh and create and pretend as they learn.
