Building Global Infrastructure Dale S. Rothman, Mohammad T. Irfan, Barry B. Hughes, Eli Margolese-Malin, Jonathan D. Moyer, 2015-12-03 Building Global Infrastructure is the fourth in a series of volumes Patterns of Potential Human Progress that uses the International Futures IFs simulation model to explore prospects for human development how development appears to be unfolding globally and locally how we would like it to evolve and how better to assure that we move it in desired directions Earlier volumes addressed the reduction of global poverty the advance of global education and the improvement of global health Volume 4 sets out to tell the story of the future of global infrastructure The approach used in this book focuses on the question of whether individual societies will be able to meet future infrastructure demands Related questions include the following What is the range of realistically conceivable futures for infrastructure considering both demand and supply How are the demands for infrastructure balanced with the ability to meet these demands thereby linking the physical and financial treatment of infrastructure What are the effects of providing for infrastructure on issues such as economic productivity and health **China's Governance Model** Hongyi Lai, 2016-06-10 Many studies of government in

China either simply describe the political institutions or else focus critically on the weaknesses of the system such as corruption or the absence of Western style democracy. Authors of these studies fail to appreciate the surprising ability of China's government to rapidly transform a once impoverished economy and to recover from numerous crises from 1978 to the present. This book on the other hand takes a more balanced more positive view. This view is based on a study of changes in China's institutions for coping with critical crises in governance since 1978. These changes include better management of leadership succession, better crisis management, improved social welfare, the management of society through treating different social groups differently depending on their potential to rival the Party state, and a variety of limited intra party and grassroots democracy. This book applies to the Chinese model the term pragmatic authoritarianism. It explains changes to and the likely future direction of China's governance model. It compares current risks in China's governance with threats that terminated dynasties and the republic in China over the past four thousand years and concludes that the regime can be expected to survive a considerable period despite its existing flaws. Few topics in Chinese politics are as significant as the nature state and prospects of the political regime. While the topic had been unduly understudied for a long period of time, a young generation of scholars has emerged on this subject. Among others, the book by Hongyi Lai stands out and provides a comprehensive and penetrating analysis on this topic. I am confident that his book will make a significant contribution to the study of Chinese politics and may well define the debate on China's political development, governance, and model for years to come. Yongnian Zheng, Director East Asian Institute, National University of Singapore.

Physical Infrastructure

Development W. Ascher, C. Krupp, 2010-05-24. This book addresses the key challenges of balancing economic growth, poverty alleviation, and environmental protection in the development of major physical infrastructure ranging from transport to energy.

Global Auction of Public Assets, *A Decade of Action in Transport*, 2007-01-01. The World Bank committed 30.6 billion in transport related projects during the past decade, making it one of the largest sectors. The evaluation looks into the Bank's experience in the sector and assesses the institution's interventions, the impact of rapid transport sector expansion, and its readiness to meet the challenges ahead.
