Newsom, 2025-04-01 Of all the human behaviors anthropologists consider perhaps the most conceptually challenging are those that cannot be directly observed This volume draws from rich ethnographic data to offer theoretical and methodological tools for mapping the intersections between two such behaviors dreaming and imagination Although Western perspectives tend to cast these as personal experiences contained within individual minds each contributor explores diverse cultural and historical contexts to demonstrate how these behaviours are always in some sense cultural and influenced by social others The cross cultural approach suggests theoretical flexibility and expands the study of imagination across multiple disciplines *The Neuroscience of Sleep and Dreams* Patrick McNamara, 2023-04-13 The Neuroscience of Sleep and Dreams provides comprehensive coverage of the basic neuroscience of both sleep and dreams for upper level undergraduate and graduate students It details new scientific discoveries places those discoveries within evolutionary context and links established findings with implications for sleep medicine This second edition focuses on recent developments in the social nature of sleep and dreams Coverage includes the neuroscience of all stages of sleep the lifespan development of these sleep stages the role of non REM and REM sleep in health and mental health comparative sleep biological rhythms sleep disorders sleep memory dream content dream phenomenology and dream functions Students scientists and interested non specialists will find this book accessible and informative **Dreams Beyond Time** Lee Irwin, 2022-05-04 Dreams Beyond Time On Sacred Encounter and Spiritual Transformation offers readers an overview of dreams research as applied to non ordinary dreams Lee Irwin describes four basic types of dreaming normative mythic psychic and transpersonal and he illustrates each type with specific dream examples These types of dreaming are then used as a lens to look more closely at additional dream types that indicate dreaming as a process of creative discovery Through virtual dreaming encounters latent human potentials are revealed and suggest aspects for spiritual development based on dream recording interpretation and analysis In turn this leads to a metaphysical description that is pan sentient illustrating a vivid living universe of process becoming in which certain dream types reveal mythic psychic and transpersonal capacities as intrinsic to a deeper more awakened sense of intersubjective self awareness While dream theories from many diverse authors are explored the author uses an existential and phenomenological method to analyze dreaming contents in relationship to altered states of mind trance out of body and near death experience meditation imagination and stages of lucid self awareness Transpersonal dreams are given
