Bedford Introduction to Drama Lee A. Jacobus, 1997 **The Routledge Research Companion to Shakespeare and Classical Literature** Sean Keilen, Nick Moschovakis, 2017-03-31 In this wide ranging and ambitiously conceived Research Companion contributors explore Shakespeare's relationship to the classic in two broad senses The essays analyze Shakespeare's specific debts to classical works and weigh his classicism's likeness and unlikeness to that of others in his time they also evaluate the effects of that classical influence to assess the extent to which it is connected with whatever qualities still make Shakespeare himself a classic arguably the classic of modern world literature and drama The first sense of the classic which the volume addresses is the classical culture of Latin and Greek reading translation and imitation Education in the canon of pagan classics bound Shakespeare together with other writers in what was the dominant tradition of English and European poetry and drama up through the nineteenth and even well into the twentieth century Second and no less central is the idea of classics as such that of books whose perceived value exceeding that of most in their era justifies their protection against historical and cultural change The volume's organizing insight is that as Shakespeare was made a classic in this second antiquarian sense his work's reception has more and more come to resemble that of classics in the first sense of ancient texts subject to labored critical study by masses of professional interpreters who are needed to mediate their meaning simply because of the texts growing remoteness from ordinary life language and consciousness The volume presents overviews and argumentative essays about the presence of Latin and Greek literature in Shakespeare's writing They coexist in the volume with thought pieces on the uses of the classical as a historical and pedagogical category and with practical essays on the place of ancient classics in today's Shakespearean classrooms Challenges and Prospects in African
Education Systems Soji Oni, 2013-11-14 Challenges and Prospects in African Education System The general idea this book is trying to disseminate is to inform readers about the compelling challenges and prospects in African system of education As

we all know when issues of Africa educational system is raised the first set of thoughts that come to mind is decline in standard deterioration of facilities examination malpractices cult crises or school based violence shortage of teachers underqualified teachers and poor teachers performance which results in poor learning standards lack of classroom discipline that is exacerbated by insufficient resources and inadequate infrastructure failure of appropriate inspection and monitoring and confusion caused by changing curricula without proper communication and training All these have led to massive demoralization and disillusionment among teachers and a negative and worsening perception of African system of education This therefore calls for in depth analysis aimed at tutoring every stakeholder in education on how their action and inactions have individually and collectively contributed to the collapsing state of education in Africa However the prospect is that Africas recovery and sustainable development can only be guaranteed through expansion and sustenance of both quantitative and qualitative of the continents stock of human capital through education In order for education to realize its key role in development it must be provided to the younger segments of African society as quickly as human and financial resources permit with the ultimate goal of developing a comprehensive meaningful and sustainable system of education at all levels and for all age groups This is the message that this book puts across in the six knitted sections
