Critical Issues In Weather Modification Research:

Critical Issues in Weather Modification Research National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Committee on the Status of and Future Directions in U.S. Weather Modification Research and Operations, 2004-01-16 The weather on planet Earth is a vital and sometimes fatal force in human affairs Efforts to control or reduce the harmful impacts of weather go back far in time In this the latest National Academies assessment of weather modification the committee was asked to assess the ability of current and proposed weather modification capabilities to provide beneficial impacts on water resource management and weather hazard mitigation It examines new technologies reviews advances in numerical modeling on the cloud and mesoscale and considers how improvements in computer capabilities might be applied to weather modification Critical Issues in Weather Modification Research examines the status of the science underlying weather modification in the United States It calls for a coordinated national research program to answer fundamental questions about basic atmospheric processes and to address other issues that are impeding progress in weather modification A Response by the Weather Modification Association to the National Research Council's Report Titled "Critical Issues in Weather Modification Research" Weather Modification Association, National Research Council (U.S.). Board on Atmospheric Sciences and Climate, 2004 Geoengineering, Parts I, II, and III United States. Congress. House. Committee on Science and Technology (2007), 2010 **Learning from Weather Modification Law for the Governance of Regional Solar Radiation Management** Manon Simon, 2024-05-09 This book investigates the role of cloud seeding laws in governing regional solar radiation management SRM activities It challenges the prevailing belief that cloud seeding laws are irrelevant to regional SRM governance and argues for their applicability Through case studies in Australia Canada and the United States the book highlights the need for legal frameworks that promote cross scale interactions stakeholder participation flexible decision making and conflict resolution It advocates for adopting adaptive governance principles to effectively manage the risks and uncertainties associated with regional SRM interventions By filling a gap in the existing literature this book offers valuable insights and recommendations for the governance of regional SRM shedding light on the potential of cloud seeding laws to inform and shape SRM governance frameworks It provides a comprehensive analysis of the legal and normative aspects offering practical guidance for policymakers researchers and stakeholders involved in regional SRM initiatives **The regulation of Geoengineering** Great Britain: Parliament: House of Commons: Science and Technology Committee, 2010-03-18 Geoengineering describes activities specifically and deliberately designed to effect a change in the global climate with the aim of minimising or reversing anthropogenic climate change The Committee gives three reasons why they believe regulation is needed First in the future some geoengineering techniques may allow a single country to unilaterally affect the climate Second some geoengineering testing is already underway Third we may need geoengineering in the event of a failure to reduce

greenhouse gases we are faced with highly disruptive climate change The Committee does not call for an international treaty but for the groundwork for regulatory arrangements to begin The UN is the route by which eventually they envisage the regulatory framework operating but first the UK and other governments need to push geoengineering up the international agenda and get processes moving *Geoengineering Discourse Confronting Climate Change* Brynna Jacobson,2022-07-07

Geoengineering the idea of addressing climate change through large scale technological projects stands out among contested technologies in the degree to which its scope of possibilities and its premise are characterized by global existential risks Despite controversy this field has been shifting toward mainstream consideration *Geoengineering Discourse Confronting Climate Change The Move from Margins to Mainstream* in Science News Media and Politics examines the trajectory of geoengineering through critical discourse analysis of three key genres science policy reports news journalism and congressional hearings Brynna Jacobson explores how reports from distinguished scientific societies have constructed certain notions of legitimacy around geoengineering how narratives within news coverage have reflected and shaped the public discourse and understanding of geoengineering and how geoengineering has garnered political support from both major political parties in the United States Through analysis of discursive conventions within these genres the author reveals the evolution of notions of normalcy legitimacy and imperative around the field of geoengineering *Rain* Cynthia Barnett,2016-04-05

Rain is elemental mysterious precious destructive It is the subject of countless poems and paintings the top of the weather report the source of the world's water Yet this is the first book to tell the story of rain Cynthia Barnett's *Rain* begins four billion years ago with the torrents that filled the oceans and builds to the storms of climate change It weaves together science the true shape of a raindrop the mysteries of frog and fish rains with the human story of our ambition to control rain from ancient rain dances to the 2 203 miles of levees that attempt to straitjacket the Mississippi River It offers a glimpse of our founding forecaster Thomas Jefferson who measured every drizzle long before modern meteorology Two centuries later rainy skies would help inspire Morrissey's mopes and Kurt Cobain's grunge *Rain* is also a travelogue taking readers to Scotland to tell the surprising story of the mackintosh raincoat and to India where villagers extract the scent of rain from the monsoon drenched earth and turn it into perfume Now after thousands of years spent praying for rain or worshipping it burning witches at the stake to stop rain or sacrificing small children to bring it mocking rain with irrigated agriculture and cities built in floodplains even trying to blast rain out of the sky with mortars meant for war humanity has finally managed to change the rain Only not in ways we intended As climate change upends rainfall patterns and unleashes increasingly severe storms and drought Barnett shows rain to be a unifying force in a fractured world Too much and not nearly enough rain is a conversation we share and this is a book for everyone who has ever experienced it

Dead Pool James Lawrence Powell,2011-02-22 Where will the water come from to sustain the great desert cities of Las Vegas Los Angeles and Phoenix In a provocative exploration of the past present and future of water in the West James

Lawrence Powell begins at Lake Powell the vast reservoir that has become an emblem of this story Writing for a wide audience Powell shows why an urgent threat during the first half of the twenty first century will come not from the rising of the seas but from the falling of the reservoirs Page 4 of cover
