Beyond Nature Marco Maurizi, 2021-08-24 In Beyond Nature Maurizi tackles the animal question from an unprecedented perspective strongly criticizing the abstract moralism that has always characterized animal rights activism the author proposes a historical materialistic analysis of the relationship between humans and non humans By contrasting the thinking of Hegel Marx and the Frankfurt School with classical authors in the field of animal rights such as Singer Regan and Francione this text offers an alternative social and dialectical theory of animality and a different practical approach to the problem of animal suffering The hopes for change placed in veganism

liberationism and animal activism are here assumed in a political revolutionary perspective in which human and animal liberation finally cease to oppose each other

The Oxford Handbook of Animal Studies Linda Kalof, 2017 The Oxford Handbook of Animal Studies tackles the infamous animal question how can humans rethink and reconfigure their relationships with other animals Over the course of five sections and thirty chapters the contributors investigate issues and concepts central to understanding our current relationship with other animals and the potential for coexistence in an ecological community of living beings

Dark Nature Richard Schneider, 2016-10-04 In The Ecological Thought eco philosopher Timothy Morton has argued for the inclusion of dark ecology in our thinking about nature Dark ecology he argues puts hesitation uncertainty irony and thoughtfulness back into ecological thinking The ecological thought he says should include negativity and irony ugliness and horror Focusing on this concept of dark ecology and its invitation to add an anti pastoral perspective to ecocriticism this collection of essays on American literature and culture offers examples of how a vision of nature's darker side can create a fuller understanding of humanity's relation to nature Included are essays on canonical American literature on new voices in American literature and on non print American media This is the first collection of essays applying the dark ecology principle to American literature

Toward a Critical Theory of Nature Carl Cassegård, 2021-01-28 Challenging the normalization of a capitalist reality in which environmental destruction and catastrophe have become second nature Towards a Critical Theory of Nature offers a bold new theoretical understanding of the current crisis via the work of the Frankfurt School Focusing on key notions of dialectics natural history and materialism a critical theory of nature is outlined in favor of a more traditional Marxist theory of nature albeit one which still builds on core Marxist concepts to confirm humanity's central place in manufacturing environmental misery Pre eminent thinkers of the Frankfurt school including Georg Lukács Ernst Bloch Theodor Adorno and Alfred Schmidt are highlighted for their potential to diagnose the interpenetration of capitalism and nature in a way that neither absolutizes nor obliterates the boundary between the social and natural Further theoretical claims and practical consequences of a critical theory of nature challenge other contemporary theoretical approaches like eco Marxism social constructivism and new materialism to situate it as the only approach with genuinely radical potential The possibility of utopian idealism for understanding and responding to the current climate crisis is carefully measured against the dangers of false hope in setting out realistic goals for change Environmental change in turn is seen through the prism of recent cultural currents and movements situating the power of a critical theory of nature in relation to understandings of the Anthropocene concepts of apocalypse and postapocalypse This book culminates in a powerful tool for an anti capitalist critique of society's painfully extractive relationship to a deceptively abstracted natural world

Recognizing the Autonomy of Nature Thomas Heyd, 2005-11-09 How do the ways in which we think about and describe nature shape the use and protection of the environment Do our seemingly well intentioned efforts in environmental conservation reflect a respect for nature or our desire to control nature's wildness The contributors to this collection address these and other questions as they explore the theoretical and practical implications of a crucial aspect of environmental philosophy and policy the autonomy of nature In focusing on the recognition and meaning of nature's autonomy and linking issues of metaphysics epistemology ethics and policy the essays provide a variety of new perspectives on human relationships to nature The authors begin by exploring what is meant by nature in what sense it can be seen as autonomous and what respect for the autonomy of nature might entail They examine the conflicts that arise between the satisfaction of human needs food shelter etc and the natural world The contributors also consider whether the activities of human beings contribute to nature's autonomy In their investigation of these issues they not only draw on philosophy and ethics they also discuss how the idea of nature's autonomy affects policy decisions regarding the protection of agricultural rural and beach areas The essays in the book's final section turn to management and restoration practices The essays in this section pay close attention to how efforts at environmental protection alter or reinforce the traditional relationship between humans and nature More specifically the contributors examine whether management practices as they are applied in nature conservation actually promote the autonomy of nature or whether they turn the environment into a client for policymakers
