Unity from Diversity Ray W. Cooksey, 2024-07-15 This book is about the choices that researchers can make when building knowledge in social and behavioural spaces Knowledge is the unity we seek and given that social and behavioural research is a human endeavour focusing on human lives and experiences there are diverse and ever evolving pathways towards achieving that unity Any one pathway will only ever yield partial glimpses into human life and diversity of potential choices serves to enrich expand and enlarge those glimpses in pursuit of more complete understanding The book shows that researchers and the researched are far more connected than disconnected in this world and those connections are spread out through a network of interlinked complex systems The book argues that pluralist systemic thinking provides the means by which a researcher s methodological choices for navigating the Data Triangle comprising data source data gathering and data analysis strategies and the learning they provide can be fully and robustly contextualised with respect to those systems and the expectations and influences that emerge from them Such contextualisations facilitate the refinement augmentation and or narrowing of those choices during the researcher s journey Anticipating choices downstream may have implications for more immediate choices and more immediate choices may create a cascade of necessary downstream choices An essential part of contextualisation involves making choices about patterns of guiding assumptions modes of knowledge building and research frames Researchers must develop the capacity to be flexible and adapt to unanticipated emergent events obstacles and political influences making trade offs where necessary throughout their research journey always with an eye on both feasibility and quality Importantly research has no meaning unless the researcher can ensure that it connects with intended audiences via specific research outcomes especially since the ultimate judgments about the convincingness meaningfulness quality and utility of the research are vested in those audiences Throughout the book special attention is devoted to the role s that stakeholders and gatekeepers play in shaping the researcher s journey as well as to what can be learned from Indigenous First Nations perspectives on social and behavioural research

World Politics in Translation Tobias Berger, Alejandro Esguerra, 2017-09-14 Virtually all pertinent issues that the world faces today such as nuclear proliferation climate change the spread of infectious disease and economic globalization imply objects that move

However surprisingly little is known about how the actual objects of world politics are constituted how they move and how they change while moving This book addresses these questions through the concept of translation the simultaneous processes of object constitution transportation and transformation Translations occur when specific forms of knowledge about the environment international human rights norms or water policies consolidate travel and change World Politics in Translation conceptualizes translation for International Relations by drawing on theoretical insights from Literary Studies Postcolonial Scholarship and Science and Technology Studies The individual chapters explore how the concept of translation opens new perspectives on development cooperation the diffusion of norms and organizational templates the performance in and of international organizations or the politics of international security governance This book constitutes an excellent resource for students and scholars in the fields of Politics International Relations Social Anthropology Development Studies and Sociology Combining empirically grounded case studies with methodological reflection and theoretical innovation the book provides a powerful and productive introduction to world politics in translation
