Citizenship and Nationhood in France and Germany Rogers Brubaker, 1992 We live in a world bounded and defined by the legal institution of citizenship The plight of immigrants moving across Western Europe has made this a particularly salient point one frequently missed but finally brought into sharp focus here Linking law state economy and culture across two countries and centuries this book offers a powerful explanation of forces that shape the modern world and delineate its future *Citizenship and Nationhood in France and Germany* Rogers BRUBAKER, 2009-06-30 The difference between French and German definitions of citizenship is instructive and for immigrants from North Africa Turkey and Eastern Europe decisive Brubaker shows how this difference between the territorial basis of the French citizenry and German emphasis on blood descent was shaped by sharply differing understandings of nationhood *Citizenship and Nationhood in France and Germany* Rogers Brubaker, 1992 We live in a world bounded and defined by the legal institution of citizenship The plight of immigrants moving across Western Europe has made this a particularly salient point one frequently missed but finally brought into sharp focus here Linking law state economy and culture across two countries and centuries this book offers a powerful explanation of forces that shape the modern world and delineate its future *Struggles for Belonging* Dieter Gosewinkel, 2021-11-04 Citizenship was the most important mark of political belonging in Europe in the twentieth century while estate religion party class and nation lost political significance in the century of extremes This is shown by examining the legal institution of citizenship with its deciding influence on the limits of a political community on inclusion and exclusion Citizenship determined a person's protection equality and freedom and thus his or her chances in life and very survival This book recounts the history of citizenship in Europe as the history of European statehood in the twentieth and early twenty first centuries It does so from three vantage points as the development of a legal institution crucial to European constitutionalism as a measure of an individual's opportunities for self fulfilment ranging from freedom to totalitarian subjugation and as a succession of alternating often sharply divergent political regimes considered from the perspective of their inclusivity and exclusivity and its justification The European history of citizenship is discussed in this book on the basis of six selected countries Great Britain France Germany Czechoslovakia Poland and Russia For the first time a joint history of citizenship in Western and Eastern Europe is told here from the heyday of the nation state to our present day which is marked by the crises of the European Union It is the history of a central legal institution that significantly represents and at the same time determines struggles over migration integration and belonging One of the central concerns of this book is what lessons can be learned when it comes to the future chances of European citizenship *Dual Nationality in the European Union* Olivier Vonk, 2012-03-19 The book analyzes the role of dual nationality in different fields of the law in particular national and EU law and offers a convincing argument for the minimum harmonization of European nationality laws **Self-Presentation and Representative Politics** Derek Robbins, 2022-01-11 Through six articles written at intervals of about a decade between

1960 and 2020 the book provides an account of the author's developing political awareness during the period in the context of political events and changes. In this way the book illustrates the social origins of political attitudes while at the same time the articles raise questions about the increasing dominance of political discourse in society. The book suggests that politics is now excessively managed by political professionals and that the challenge for reviving democratic participation is to restore the social dimension of state membership.

Contingent Citizenship Sandra Mantu, 2015-09-07 In *Contingent citizenship* Sandra Mantu examines the changing rules of citizenship deprivation in the UK, France and Germany from the perspective of international and European legal standards. In practice two grounds upon which loss of citizenship takes place stand out: fraud in the context of fraudulent acquisition of nationality and terrorism in the context of national security. Newly naturalised citizens and citizens of immigrant origin are mainly targeted by these measures. The resurrection of the importance attached to loyalty as the citizen's main duty towards his/her state shows that the rules on loss of citizenship are capable of expressing ideals of membership and identity while the citizenship status of certain citizens remains contingent upon meeting these ideals.

Citizenship Elizabeth F. Cohen, Cyril Ghosh, 2019-07-09 Although we live in a period of unprecedented globalization and mass migration, many contemporary western liberal democracies are asserting their sovereignty over who gets to become members of their polities with renewed ferocity. Citizenship matters more than ever. In this book Elizabeth F. Cohen and Cyril Ghosh provide a concise and comprehensive introduction to the concept of citizenship and evaluate the idea's continuing relevance in the 21st century. They examine multiple facets of the concept including the classic and contemporary theories that inform the practice of citizenship, the historical development of citizenship as a practice and citizenship as an instrument of administrative rationality as well as lived experience. They show how access to a range of rights and privileges that accrue from citizenship in countries of the global north is creating a global citizenship based caste system. This skillful critical appraisal of citizenship in the context of phenomena such as the global refugee crisis, South-North migration and growing demands for minority rights will be essential reading for students and scholars of citizenship, migration studies and democratic theory.

Immigration and German Identity in the Federal Republic of Germany from 1945 to 2006 Duncan Cooper, 2012 Since the end of World War II millions of people from different parts of the world have migrated to the Federal Republic of Germany and its immediate predecessors, the Western zones of occupation. This dissertation investigates the German population's changing views on immigrants and on issues related to immigration between 1945 and 2006. As people from many different ethnic and cultural backgrounds have migrated to the country in the period under consideration, the population's views provide tantalizing insights into changing perceptions of German identity.
