Critica Razon Pura Spanish Immanuel:

Experiencing the Beyond Gert Melville, Carlos Ruta, 2017-11-20 Experiencing the dimension that lies beyond our empirical grasp of the world has always been a challenge for human beings for it can expose the limitations of our agency Such experience while potentially terrifying can also furnish a basis for religious faith or hope of a better future The intercultural essays in this volume analyze ways of dealing with the beyond including magic religion myth and all promising utopias *On Genes, Gods and Tyrants* Camilo J. Cela-Conde, Penelope Lock, 2012-12-06 Our future was with the collective but our survival was with the individual and the paradox was killing us everyday John Le Carre Smiley s People 1979 Since the time of Ancient Greek lyrical poetry it has been one of man s dreams to explain his own conduct This is the background to all his activities from literature to speculative philosophy including those odds and ends which for want of a better name and more precise boundaries are called human science Over the past nine or ten years a new member has been added to this inquisitive family one which moreover claims to be scientific to an extremely high degree biology This is in fact a recurrent event since theses designed to introduce causal biological explanations into the general field of human action had already been formulated on at least two occasions in original Darwinism and the Neo Darwinist synthesis Ethologists and sociobiologists are today taking over and assuring us that they have the necessary tools to provide an answer to what perhaps seemed the most slippery subject in the hands of science the social being As might be expected philosophers have reacted with some scepticism Though human conduct is undoubtedly subject to determinants the lion s share of responsibility lies with society itself At the time when biology was beginning to develop the theories necessary to overcome creationism Karl Marx had already managed to construct highly sophisticated interpretive models of human social behaviour
