Critical Ecologies The Frankfurt School And Contemporary Environmental Crises:

Critical Ecologies Andrew Biro, 2011-01-01 Environmental movements are the subject of increasingly rigorous political theoretical study Can the Frankfurt School's critical frameworks be used to address ecological issues or do environmental conflicts remain part of the failed promise of this group Critical Ecologies aims to redeem the theories of major Frankfurt thinkers Theodor Adorno Max Horkheimer and Herbert Marcuse among others by applying them to contemporary environmental crises Critical Ecologies argues that sustainability and critical social theory have many similar goals including resistance to different forms of domination Like the Frankfurt School itself the essays in this volume reflect a spirit of interdisciplinarity and draw attention to intersections between environmental socio political and philosophical issues Offering textual analyses by leading scholars in both critical theory and environmental politics Critical Ecologies underscores the continued relevance of the Frankfurt School's ideas for addressing contemporary issues

Readings in the Anthropocene Sabine Wilke, Japhet Johnstone, 2017-09-21 Readings in the Anthropocene brings together scholars from German Studies and beyond to interpret the German tradition of the last two hundred years from a perspective that is mindful of the challenge posed by the concept of the Anthropocene This new age of man unofficially pronounced in 2000 holds that humans are becoming a geological force in shaping the Earth's future Among the biggest challenges facing our future are climate change accelerated species loss and a radical transformation of land use What are the historical philosophical cultural literary and artistic responses to this new concept The essays in this volume bring German culture to bear on what it means to live in the Anthropocene from a historical ethical and aesthetic perspective

Critical Theory and the Thought of Andrew Feenberg Darrell P. Arnold, Andreas Michel, 2017-11-01 This volume explores Andrew Feenberg's work in critical theory Feenberg is considered one of the key second generation critical theorists with a keen interest in philosophy of technology He has made a vital contribution to critical theory in ways that remain of interest given the pressing technological issues of our time The authors of this book highlight not only the ways that Feenberg has begun to make good on what is often characterized as the broken promise of critical theory to address issues of technology but also the continued importance of critical theory more generally and of Feenberg's contributions to understanding this tradition

Multiple Perspectives on the Study of Life Lema Habash, Nicolas, Chirolla Ospina, Gustavo, 2024-03-30 The infinite multiplicity of existing life forms calls for equally multiple approaches to studying the living However no approach will ever be capable of exhausting the various perspectives required for research on life This impossibility is not only given by the unmanageable task of establishing an infinitely multidisciplinary approach but also by the diverse and ever changing subject matters that can potentially fall under the category of the living This book is nevertheless an effort in that direction acknowledging a multiplicity of ways in which life forms may be studied and a diversity of disciplinary perspectives suited for this task

Beyond the World's End T. J. Demos, 2020-08-03 In Beyond the World's End T J Demos explores cultural practices that

provide radical propositions for living in a world beset by environmental and political crises Rethinking relationships between aesthetics and an expanded political ecology that foregrounds just futurity Demos examines how contemporary artists are diversely addressing urgent themes including John Akomfrah's cinematic entanglements of racial capitalism with current environmental threats the visual politics of climate refugees in work by Forensic Architecture and Teddy Cruz and Fonna Forman and moving images of Afrofuturist climate justice in projects by Arthur Jafa and Martine Syms Demos considers video and mixed media art that responds to resource extraction in works by Angela Melitopoulos Allora Calzadilla and Ursula Biemann as well as the multispecies ecologies of Terike Haapoja and Public Studio Throughout Demos contends that contemporary intersections of aesthetics and politics as exemplified in the Standing Rock NoDAPL campaign and the Zad's autonomous zone in France are creating the imaginaries that will be crucial to building a socially just and flourishing future

Post-growth Politics Peter Ferguson, 2018-06-19 This book uses a critical political economy approach to develop an historically and politically grounded set of strategies for states to move toward a post growth decarbonised global economy It begins by examining the social and ecological costs of and limits to economic growth and determines that significant decarbonisation of the global economy can only be achieved if conventional growth based economies are replaced by an alternative post growth economy Set apart from many other works in the field by its critical political economy approach to policy development this book offers the reader three distinctive features First it places the analysis in historical context in order to demonstrate how the global political economy is constantly changing with respect to distributions of wealth power and fundamental norms and explores how states might harness and transform these contingent patterns in a post growth direction Second the book is not only concerned with developing and advocating post growth policies but also with how these measures can be incorporated into the high level domestic and international strategies pursued by states to ensure their political legitimacy and economic and geopolitical survival Third rather than proposing an idealised and politically naive model of socioecological transformation the proposed post growth policy framework is highly cognisant of the geopolitical and international economic pressures facing states and demonstrates how these can be managed in the transition toward a post growth economy This book represents an invaluable resource for policymakers academics activists and students wishing to study or contribute to the transition to a post growth decarbonised economy

Crisis Narratives in International Law Makane Moïse Mbengue, Jean D'Aspremont, 2021-11-15 This volume offers a series of short and highly self reflective essays by leading international lawyers on the relation between international law and crises It particularly shows that international law shapes the crises that it addresses as much as it is shaped by them It critically evaluates the modes of intervention of international law in the problems of the world Together these essays provide a unique stocktaking about the role limits and potential of international law as well as the worlds that are imagined through international lawyers vocabularies

Ontological Politics in a Disposable World Luigi Pellizzoni, 2016-03-03 This book explores the intertwining of politics
