The Great Lakes Water Wars Peter Annin, 2009-08-25 The Great Lakes are the largest collection of fresh surface water on earth and more than 40 million Americans and Canadians live in their basin Will we divert water from the Great Lakes causing them to end up like Central Asia's Aral Sea which has lost 90 percent of its surface area and 75 percent of its volume since 1960 Or will we come to see that unregulated water withdrawals are ultimately catastrophic Peter Annin writes a fast paced account of the people and stories behind these upcoming battles Destined to be the definitive story for the general public as well as policymakers The Great Lakes Water Wars is a balanced comprehensive look behind the scenes at the conflicts and compromises that are the past and future of this unique resource *Lakefront* Joseph D. Kearney, Thomas W. Merrill, 2021-05-15 How did Chicago a city known for commerce come to have such a splendid public waterfront its most treasured asset *Lakefront* reveals a story of social political and legal conflict in which private and public rights have clashed repeatedly over time only to produce as a kind of miracle a generally happy ending Joseph D Kearney and Thomas W Merrill study the lakefront's evolution from the middle of the nineteenth century to the twenty first Their findings have significance for understanding not only Chicago's history but also the law's part in determining the future of significant urban resources such as waterfronts The Chicago lakefront is where the American public trust doctrine holding certain public resources off limits to private development was born This book describes the circumstances that gave rise to the doctrine and its fluctuating importance over time and reveals how it was resurrected in the later twentieth century to become the primary principle for mediating clashes between public and private lakefront rights *Lakefront* compares the effectiveness of the public trust idea to other property doctrines and assesses the role of the law as compared with more institutional developments such as the emergence of sanitary commissions and park districts in securing the protection of the lakefront for public uses By charting its history Kearney and Merrill demonstrate that the lakefront's current status is in part a product of individuals and events unique to Chicago But technological changes and a transformation in social values in favor of recreational and preservationist uses also have been critical Throughout the law while also in a state of continual change has played at least a supporting role *Five Bay Landscapes* Karen Lutsky, Sean Burkholder, 2022-12-06 Threatened by issues of environmental health climate change population growth and industrial demands the coastal zone of the Great Lakes reflects an increasingly dysfunctional relationship between the people of the basin and the resources that support them Perhaps no place is the physical manifestation of this struggle more evident than in the basin's shallow bays While many regional and local responses to these issues focus on methods of control *Five Bay Landscapes* argues that responses should begin with critical experiential and pluralistic understandings of place Through a series of five narratives each located on a bay within the Great Lakes the authors share their practice of curious site explorations These explorations both written and visual consider the nuances and systems of these shorelines along with the lessons these findings might offer for future design and

planning interventions Using the Great Lakes as a context Five Bay Landscapes illuminates a dynamic and robust landscape system and establishes a series of methods for understanding analyzing and intervening within the changing landscape
