Contemporaneous Issues about Creativity Lisete Barlach, 2025-02-26 Over the last decades scholars and practitioners have studied creativity as the production of original and effective ideas capable of being applied to different fields of existence More recently it has been recognized as one of the most important skills for the 21st century as a differential for professionals and as a basis for innovation Even with this acknowledgement creativity is being challenged by advances in Artificial Intelligence especially generative intelligence which is seen as capable of performing creative activities and eventually replacing human creativity Besides that more and more is said about the role of schools in preparing for this new world by developing creativity to enhance opportunities for work and careers The book goes beyond by introducing the relationship between creativity and mental health defying the standard view which associates creativity with madness and taking creativity as a tool for therapeutic processes *The Economic Evaluation of Projects* David G. Davies, 1996 World Bank Discussion Paper No 329 Tests the hypothesis that appropriate joint management of transboundary fish stocks can help avoid overexploitation of these resources while increasing rents and benefits Focusing on the industrial pelagic fisheries of northern Chile and southern Peru the authors present various quantitative models for identifying industry characteristics and calculating benefits **ILO Programme Implementation 2008-09** International Labour Office, 2010 *Foreign Operations, Export Financing, and Related Programs Appropriations for 2004* United States. Congress. House. Committee on Appropriations. Subcommittee on Foreign Operations, Export Financing, and Related Programs, 1994 **Inside Brazilian Bureaucracy** Barry Ames, João V. Guedes-Neto, 2025-05-15 Although the everyday actions of civil servants and the overall performance of government agencies have huge impacts on the lives of Latin America's citizens scholars have only recently begun to analyze the region's bureaucrats and bureaucracies This book focuses on bureaucratic attitudes and agency behavior in a diverse group of Brazilian states The book begins with a survey of state level bureaucrats a survey centering on perceptions of political bias and on the networks bureaucrats construct to perform their jobs and advance their careers In collaboration with Brazilian scholars the book then analyzes the implementation of nine policies in a diverse set of states These policies include the construction of a light rail system and a peripheral highway management of a children's hospital and a river basin establishment of a framework for cooperative economic programs the rolling back of a decentralization program a reform of secondary education cleaning a major river and restructuring a transportation department The final chapter assesses the implications of the book's findings for bureaucracy as a whole and for Brazilian politics This book will be useful for students and scholars of Latin American politics and for policymakers and development practitioners

Accountability of the International Monetary Fund Barry Carin, Angela Wood, 2005 Brings together leading experts from all over the world to further the debate on the various dimensions of accountability of IMF to its various shareholders and stakeholders Having fully explored how the notion of accountability can be pragmatically applied it then tests various

alternative approaches and makes some recommendations

The World Bank Legal Review, Volume 1: Law and Justice for Development World Bank, 2022-05-20 Sustainable poverty reduction and equitable economic development rest on the firm foundation of the rule of law. On the domestic front, countries must engage in legal reform in order to maximize the benefits of globalization, increase efficiency in business transactions, improve the way governments deliver essential services, and facilitate access to an effective justice system. Internationally, new rules are needed to face global threats such as money laundering, destabilizing capital movements, communicable diseases, and attacks on the environment. The first volume of The World Bank Legal Review, Law and Justice for Development, is the result of the World Bank's unique experience with legal and judicial innovations and research around the world. It will be of interest to policy makers, attorneys, international development professionals, and anyone interested in the role of law and justice in the multifaceted struggle to relieve poverty and improve living standards in developing countries.

The Sociology of "Structural Disaster" Miwao Matsumoto, 2021-03-29 How and why did credible scientists, engineers, government officials, journalists, and others collectively give rise to a drastic failure to control the threat to the population of the Fukushima disaster? Why was there no effort on the part of inter-organizational networks well coordinated in the nuclear village to prevent the risks from turning into a disaster? This book answers these questions by formulating the concept of structural disaster afresh. First, the book presents the path-dependent development of structural disaster through a sociological reformulation of path-dependent mechanisms, not only in the context of nuclear energy but also in the context of renewable energy. Secondly, it traces the origins of structural disaster to a secret accident involving standardized military technology immediately before World War II and opportunistic utilization of the Great Kanto Earthquake of 1923, thus reconstructing the development of structural disaster within a long-term historical perspective. Maintaining distance from conflicts of interest and cultural essentialisms, this book highlights configurations and mechanisms of structural disasters that are far more persistent, more universal, but less visible and that have turned risk into suffering. The book seeks to cast light on an important new horizon of the science-technology-society interface in the sociology of science and technology. Science and technology studies the sociology of disaster, the social history of the military-industrial-university complex, and beyond.

The Tsunami of 2004 in Sri Lanka Ragnhild Lund, Piers Blaikie, 2013-10-18 This book is based on empirical research in Sri Lanka conducted after the catastrophic tsunami which hit the country in December 2004. The aims of the research have been to develop new knowledge on post-crisis reconstruction and recovery work, on how to bridge the knowledge gap between researchers and practitioners, as well as trying to use past research experiences from Sri Lanka to learn about the present-day situation. The chapters use a common analytical frame related to the policy narratives of post-tsunami recovery in the shadow of war and deal with housing reconstruction, livelihoods, internally displaced, humanitarian interventions, and protracted conflicts. The authors represent various social scientific fields and they have experience from different geographical areas of Sri Lanka. This book was published as a special

issue of Norsk Geografisk Tidsskrift **Internally Displaced People** Janie Hampton, 2014-10-14 The number of internally displaced people far outnumbers estimated refugees who have fled their countries The majority of displaced populations survive with very little security or legal protection Responding to the needs of internally displaced people is one of the greatest humanitarian challenges of our time Revised and updated from the first edition this volume includes information on internal displacement in 47 different countries across the globe that is to say all countries experiencing conflict induced displacement at the time of publication There is discussion of the causes of displacement patterns of flight protection concerns and international response
