Computer Vision And Image Processing In Intelligent Systems And Multimedia Technologies:

Computer Vision and Image Processing in Intelligent Systems and Multimedia Technologies Sarfraz, Muhammad, 2014-04-30 The fields of computer vision and image processing are constantly evolving as new research and applications in these areas emerge Staying abreast of the most up to date developments in this field is necessary in order to promote further research and apply these developments in real world settings Computer Vision and Image Processing in Intelligent Systems and Multimedia Technologies features timely and informative research on the design and development of computer vision and image processing applications in intelligent agents as well as in multimedia technologies Covering a diverse set of research in these areas this publication is ideally designed for use by academicians technology professionals students and researchers interested in uncovering the latest innovations in the field Advancements in Computer Vision Applications in Intelligent Systems and Multimedia Technologies Sarfraz, Muhammad, 2020-05-29 Two significant areas of study that are continually impacting various dimensions in computer science are computer vision and imaging These technologies are rapidly enhancing how information and data is being exchanged and opening numerous avenues of advancement within areas such as multimedia and intelligent systems The high level of applicability in computer vision and image processing requires significant research on the specific utilizations of these technologies Advancements in Computer Vision Applications in Intelligent Systems and Multimedia Technologies is an essential reference source that discusses innovative developments in computational imaging for solving real life issues and problems and addresses their execution in various disciplines Featuring research on topics such as image modeling remote sensing and support vector machines this book is ideally designed for IT specialists scientists researchers engineers developers practitioners industry professionals academicians and students seeking coverage on the latest developments and innovations in computer vision applications within the realm of multimedia systems Recent Advances in Ambient Intelligence and Context-Aware Computing Curran, Kevin, 2014-11-30 Modern devices from phones and cars to houses and the appliances within them are being designed with formidable computational power and expanded functionality To be truly effective these smart devices must effectively process data from their environment and experiences and make decisions based on that information Recent Advances in Ambient Intelligence and Context Aware Computing investigates the functionality of ubiquitous computational systems and how they may adapt to their environment to improve the quality of interaction for the end user This reference book will be of value to under and post graduate students professionals and researchers in networking computer science communications and other information technology disciplines **Advances in Data-driven Computing and Intelligent Systems** Jagdish Chand Bansal, Snehanishu Saha, Carlos A. Coello Coello, Hemant Rathore, 2025-07-26 This book is a collection of best selected research papers presented at the International Conference on Advances in Data driven Computing and Intelligent Systems ADCIS 2024 held at BITS Pilani K K Birla Goa Campus Goa India during September 20 21 2024 It includes state of the art

research work in the cutting edge technologies in the field of data science and intelligent systems The book presents data driven computing it is a new field of computational analysis which uses provided data to directly produce predictive outcomes The book is useful for academicians research scholars and industry persons *Machine Learning for Intelligent Systems* Dr. R. Vasanthi, Divesh Singh Sai, Dr. Gayatri Hegde, Dr. T. Aditya Sai Srinivas ,2025-09-27 Machine Learning for Intelligent Systems focuses on the design and development of systems that can learn adapt and make intelligent decisions autonomously It integrates principles of machine learning artificial intelligence and data analytics to build systems capable of perceiving their environment and improving performance through experience The subject covers supervised and unsupervised learning algorithms neural networks reinforcement learning and deep learning techniques Applications include robotics autonomous vehicles smart devices and intelligent control systems The course emphasizes both theoretical understanding and practical implementation of intelligent data driven systems that can operate effectively in dynamic and complex environments
