

SOLUTION

Given a bridge has a parabolic arch of 10 m high in the centre and 30 m wide at the bottom.

Choose the vertex as the origin and the axis of the parabola as the y -axis.

The parabola is open downward.

AB - Width of the bottom = 30 m ,

CO - Height of the parabolic arch at the centre = 10 m.

$\therefore$ The coordinate of B is (CB, -OC) , B is (15, -10)

By our choice the equation of the parabola is $x^2 = -4ay$ ----- (1)

B(15, -10) is a point on the parabola. $\therefore 15^2 = -4a \times -10 \Rightarrow 4a = \frac{15^2}{10}$

The equation of the parabola becomes $x^2 = -\frac{15^2}{10}y$ ----- (2)

D is a point 6m from the centre. DE is the height of the parabolic arch at a distance of 6m from the centre.

Let the coordinates of E be (6, -y). Substituting in equation (2) we get

$$6^2 = -\frac{15^2}{10} \times -y \Rightarrow y = \frac{36 \times 10}{225} = \frac{360}{225} = 1.6 \Rightarrow OF = 1.6$$

Required height DE = CF = CO - OF $\Rightarrow$ DE = 10 - 1.6 = 8.4

$\therefore$ The height of the arch at a distance 6m from the centre is 8.4 m.

Conic Sections Application Problems:

Fundamentals of Astrodynamics and Applications D.A. Vallado, 2001-06-30 Fundamentals of Astrodynamics and Applications is rapidly becoming the standard astrodynamics reference for those involved in the business of spaceflight What sets this book apart is that nearly all of the theoretical mathematics is followed by discussions of practical applications implemented in tested software routines For example the book includes a compendium of algorithms that allow students and professionals to determine orbits with high precision using a PC Without a doubt when an astrodynamics problem arises in the future it will become standard practice for engineers to keep this volume close at hand and look it up in Vallado While the first edition was an exceptionally useful and popular book throughout the community there are a number of reasons why the second edition will be even more so There are many reworked examples and derivations Newly introduced topics include ground illumination calculations Moon rise and set and a listing of relevant Internet sites There is an improved and expanded discussion of coordinate systems orbit determination and differential correction Perhaps most important is that all of the software routines described in the book are now available for free in FORTRAN PASCAL and C This makes the second edition an even more valuable text and superb reference

manuals and interactive simulations offering additional guidance practice problems and opportunities for further exploration and self assessment Multivariate Calculus and Geometry Concepts is suitable for undergraduate and graduate students in mathematics engineering physics computer science and related disciplines It also serves as a valuable reference for researchers educators and professionals seeking a comprehensive overview of multivariate calculus and geometry and its applications in modern science and technology

Inverse Problems in Ordinary Differential Equations and Applications Jaume Llibre,Rafael Ramírez,2016-03-09 This book is dedicated to study the inverse problem of ordinary differential equations that is it focuses in finding all ordinary differential equations that satisfy a given set of properties The Nambu bracket is the central tool in developing this approach The authors start characterizing the ordinary differential equations in $\mathbb{R}^n$ which have a given set of partial integrals or first integrals The results obtained are applied first to planar polynomial differential systems with a given set of such integrals second to solve the 16th Hilbert problem restricted to generic algebraic limit cycles third for solving the inverse problem for constrained Lagrangian and Hamiltonian mechanical systems fourth for studying the integrability of a constrained rigid body Finally the authors conclude with an analysis on nonholonomic mechanics a generalization of the Hamiltonian principle and the statement an solution of the inverse problem in vakonomic mechanics
