Personal Construct Psychotherapy David A. Winter,Linda Viney,2008-09-15 In the half century that has passed since George Kelly put forward his psychology of personal constructs there have been major advances in the form of psychotherapy derived from his theory This book presents developments in the personal construct theory perspective on psychological disorders and their treatment in the context of contemporary issues in psychotherapy illustrates the diverse range of personal construct psychotherapy approaches that have been devised for a wide range of clinical problems and indicates the growing evidence base for these approaches It contains contributions from most of the leading international practitioners in the field It will not only be of interest to psychotherapists other clinicians academics and students who are already familiar with personal construct theory or constructivism but also to those who are seeking a therapeutic approach which is integrative but has a clear theoretical rationale and which is able to combine humanism with rigour

How the Workers Became Muslims Ferruh Yilmaz,2016-02-22 Writing in the beginning of the 1980s Ernesto Laclau and Chantal Mouffe explored possibilities for a new socialist strategy to capitalize on the period s fragmented political and social conditions Two and a half decades later Ferruh Yilmaz acknowledges that the populist Far Right not the socialist movement has demonstrated greater facility in adopting successful hegemonic strategies along new structural lines Laclau and Mouffe imagined Right wing hegemonic strategy Yilmaz argues has led to the reconfiguration of internal fault lines in European societies Yilmaz s primary case study is Danish immigration discourse but his argument contextualizes his study in terms of questions of current concern across Europe where right wing groups that were long on the fringes of legitimate politics have managed to make significant gains with populations traditionally aligned with the Left Specifically Yilmaz

argues that sociopolitical space has been transformed in the last three decades such that group classification has been destabilized to emphasize cultural rather than economic attributes According to this point of view traditional European social and political splits are jettisoned for new cultural alliances pulling the political spectrum to the right against the corrosive presence of Muslim immigrants whose own social and political variety is flattened into an illusion of alien sameness **How Forests Think** Eduardo Kohn,2013-08-03 Can forests think Do dogs dream In this astonishing book Eduardo Kohn challenges the very foundations of anthropology calling into question our central assumptions about what it means to be human and thus distinct from all other life forms Based on four years of fieldwork among the Runa of Ecuador's Upper Amazon Eduardo Kohn draws on his rich ethnography to explore how Amazonians interact with the many creatures that inhabit one of the world's most complex ecosystems Whether or not we recognize it our anthropological tools hinge on those capacities that make us distinctly human However when we turn our ethnographic attention to how we relate to other kinds of beings these tools which have the effect of divorcing us from the rest of the world break down *How Forests Think* seizes on this breakdown as an opportunity Avoiding reductionistic solutions and without losing sight of how our lives and those of others are caught up in the moral webs we humans spin this book skillfully fashions new kinds of conceptual tools from the strange and unexpected properties of the living world itself In this groundbreaking work Kohn takes anthropology in a new and exciting direction one that offers a more capacious way to think about the world we share with other kinds of beings
