of Western North America Arthur V. Evans, 2021-09-28 Beetles are incredibly diverse with over 23 000 named species in the United States alone They take on all hues shapes and sizes from the iridescent green of the Western Cedar Borer to the striking red of the Rose Curculio They can also be found in a wide range of habitats from cold mountain streams to scorching deserts Similar to its eastern counterpart Beetles of Eastern North America this book is a comprehensive guide to the beetles of the US and Canada that can be found west of the Continental Divide It covers over 1 400 species across 130 different families The book begins with a general introduction to beetles with sections on morphology behavior and natural history and conservation as well as information on how to find and photograph beetles After the introduction there is an illustrated key to common beetle families The family descriptions include information on natural history collection identification common genera and species and similar families **Diving Beetles of the World** Kelly B. Miller, Johannes Bergsten, 2016-10-18 The first comprehensive book in more than a century to reveal the diversity and natural history of diving beetles Among the hundreds of thousands of species of beetles there is one family containing some 4 300 species that stands out as one of the most diverse and important groups of aquatic predatory insects This is the Dytiscidae whose species are commonly known as

diving beetles No comprehensive treatment of this group has been compiled in over 130 years a period during which a great many changes in classification and a near quadrupling of known species has occurred In *Diving Beetles of the World* Kelly B Miller and Johannes Bergsten provide the only full treatments of all 188 Dytiscid genera ever assembled Entomologists systematists limnologists ecologists and others with an interest in aquatic systems or insect diversity will find these extensively illustrated keys and taxon accounts immensely helpful The keys make it possible to identify all taxa from subfamily to genera and each key and taxon treatment is accompanied by both photographs and detailed pen and ink drawings of diagnostic features Every genus account covers body length diagnostic characters classification species diversity a review of known natural history and world distribution Each account is also accompanied by a range map and at least one high resolution habitus image of a specimen Diving beetles are fast becoming important models for aquatic ecology world biogeography population ecology and animal sexual evolution and with this book the diversity of the group is finally accessible
