Dictionary of British Sign Language/English David Brien,1992 **The Linguistics of British Sign Language** Rachel Sutton-Spence,Bencie Woll,1999-03-18 This is the first detailed explanation of the way British Sign Language works and is the product of many years experience of research and teaching sign linguistics to deaf and hearing people It assumes no previous knowledge of linguistics or sign language and is not structured around traditional headings such as phonology morphology and syntax Instead it is set out in such a way as to help learners and their teachers understand the linguistic principles behind the language There are sections on BSL grammar and also on the use of BSL including social acceptability in signing variation and poetry and humour in BSL Technical terms and linguistic jargon are kept to a minimum and the text contains many examples from English BSL and other spoken and sign languages The book is amply illustrated and contains exercises as well as a reading list for further study An accompanying 90 minute DVD is available from Talk With Sign Books To find out more visit <http://www.talkwithsign.com/linguistics/british-sign-language/p741.html> **Sign Language Link** Cath Smith,1999 This work provides descriptions of BSL vocabulary in a large print reference book that will lie flat leaving the hands free for signing It contains 1000 conversational words with 360 illustrated descriptions new index deafblind communication advice and a preface calling for government recognition of BSL

Exploring British Sign Language via Systemic Functional Linguistics Luke A. Rudge,2022-09-08 One of many natural sign languages in use around the world British Sign Language BSL operates as a fully fledged semiotic system in the visual spatial modality through the simultaneous use of embodied articulators Filling a gap in current research this book investigates visual spatial communications from a functional perspective Presenting a description and analysis of BSL from the perspective of Hallidayan Systemic Functional Linguistics Luke A Rudge explores how BSL users make meaning from three different yet interrelated perspectives How exchanges of information are managed at a social level the interpersonal metafunction How experience is encoded in the language the experiential metafunction How communications are organised into coherent parts and wholes the textual metafunction Examining these perspectives both separately and together

Exploring British Sign Language via Systemic Functional Linguistics places them within the context of current observations in sign linguistics providing a complementary viewpoint on how visual spatial communications may be understood as social semiosis
