e des v nements des ann es 1940 au d but de la d cennie 1990 History as a Kind of Writing Philippe Carrard,2017-03-07
In academia the traditional role of the humanities is being questioned by the posts postmodernism poststructuralism and postfeminism which means that the project of writing history only grows more complex In History as a Kind of Writing scholar of French literature and culture Philippe Carrard speaks to this complexity by focusing the lens on the current state of French historiography Carrard s work here is expansive examining the conventions historians draw on to produce their texts and casting light on views put forward by literary theorists theorists of history and historians themselves Ranging from discussions of lengthy dissertations on 1960s social and economic history to a more contemporary focus on events actors memory and culture the book digs deep into the how of history How do historians arrange their data into narratives What strategies do they employ to justify the validity of their descriptions Are actors given their own voice Along the way Carrard also readdresses questions fundamental to the field including its necessary membership in the narrative genre the presumed objectivity of historiographic writing and the place of history as a science distinct from the natural and theoretical sciences

Workers of the Empire, Unite Yann Béliard,Neville Kirk,2021-03-01 In most studies of British decolonisation the world of labour is neglected the key roles being allocated to metropolitan statesmen and native elites Instead this volume focuses on the role played by working people their experiences initiatives and organisations in the dissolution of the British Empire both in the metropole and in the colonies How central was the intervention of the metropolitan Left in the liquidation of the British Empire Were labour mobilisations in the colonies only stepping stones for bourgeois nationalists To what extent were British labour activists willing and able to form connections with colonial workers and vice versa Here are some of the complex questions on which this volume sheds new light Though convergences were fragile and temporary this book

recapture the sense of uncertainty that accompanied the final decades of the British Empire a period when radical minorities hoped that coordinated efforts across borders might lead not only to the destruction of the British Empire but to that of capitalism and imperialism in general Exploiting rare primary sources and adopting a resolutely transnational approach our collection makes an original contribution to both labour history and imperial studies
