political actor who deployed his opponents language for strategic reasons Gilks therefore reinterprets Quatremere's interventions by situating them in their polemical contexts and treating them as contributions to debates and quarrels by locating his sources and reconstructing his social and political networks The resulting study revises our understanding of Quatremere's famous reflections on the Academy of Painting and Sculpture the Pantheon on art plunder and museums but it also discovers and sheds light on previously ignored writings Although the study focuses on the period 1789-1799 it examines the second half of Quatremere's life to substantiate his commitment to crown and altar and show how he fought against the Revolution's legacy of godless materialism and calculation that was inimical to the arts This is a thoroughly researched and richly detailed contextual study of the most eventful period in Quatremere's life but it also offers an original and unfamiliar history of the French Revolution Gilks integrates the study of political power with the history of ideas and art history and provides a window into institutional and legal reforms and debates about cultural patronage and education

[Crusading and Warfare in the Middle Ages](#) Simon John, Nicholas Morton, 2016-04-22 This volume has been created by scholars from a range of disciplines who wish to show their appreciation for Professor John France and to celebrate his career and achievements For many decades Professor France's work has been instrumental in many of the advances made in the fields of crusader studies and medieval warfare He has published widely on these topics

including major publications such as *Victory in the East A Military History of the First Crusade* 1994 and *Western Warfare in the Age of the Crusades* 1999 This present volume mirrors his interests offering studies upon both areas The fifteen essays cover a wide variety of topics spanning chronologically from the Carolingian period through to the early fourteenth century Some offer new insights upon long contested issues such as the question of whether a new form of cavalry was created by Charles Martel and his successors or the implications of the Mongol defeat at Ayn Jalut Others use innovative methodologies to unlock the potential of various types of source material including manuscript illuminations depicting warfare Templar graffiti German crusading songs and crusading charters Several of the articles open up new areas of debate connected to the history of crusading Malcolm Barber discusses why Christendom did not react decisively to the fall of Acre in 1291 Bernard Hamilton explores how the rising Frankish presence in the Eastern Mediterranean during the central medieval period reshaped Christendom's knowledge and understanding of the North African cultures they encountered In this way this work seeks both to advance debate in core areas whilst opening new vistas for future research

History as a Profession Pim den Boer, 2014-07-14 This is a vivid portrait of the French historical profession in the nineteenth and early twentieth centuries concluding just before the emergence of the famous Annales school of historians It places the profession in its social academic and political context and shows that historians of the period have been unfairly maligned as amateurish and primitive in comparison to their more celebrated successors Pim den Boer begins by sketching the contours of French historiography in the nineteenth century examining the quantity of historical writing its subject matter and who wrote it He traces the growing influence of professional historians He shows the increasing involvement of the national government in historical studies paying special attention to the impact of political factions ranging from ultraroyalists to radical republicans He explores how historical research and teaching changed at schools and universities And he shows how nineteenth century historians keen understanding of the past and of historical methodology laid the foundations for historiography in the twentieth century archives including official documents confidential reports and personal letters Den Boer makes use of statistical biographical and methodological analysis and demonstrates comprehensive knowledge of both minor historians and leading scholars including Charles Seignobos and Charles Victor Langlois Originally published in 1998 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
