Consequentialism And Its Critics Oxford Readings In Philosophy:

Consequentialism and Its Critics Samuel Scheffler, 1988 This volume presents papers discussing arguments on both sides of the consequentialist debate The distinguished contributors include John Rawls Bernard Williams Thomas Nagel Derek Parfit among others

Consequentialism and Its Critics Samuel Scheffler, *The Ethics of Genetic Engineering* Roberta M. Berry, 2013-05-13 Human genetic engineering may soon be possible The gathering debate about this prospect already threatens to become mired in irresolvable disagreement After surveying the scientific and technological developments that have brought us to this pass *The Ethics of Genetic Engineering* focuses on the ethical and policy debate noting the deep divide that separates proponents and opponents The book locates the source of this divide in differing framing assumptions reductionist pluralist on one side holist communitarian on the other The book argues that we must bridge this divide drawing on the resources from both encampments if we are to understand and cope with the distinctive problems posed by genetic engineering These problems termed fractious problems are novel complex ethically fraught unavoidably of public concern and unavoidably divisive Berry examines three prominent ethical and political theories utilitarianism Kantianism and virtue ethics to consider their competency in bridging the divide and addressing these fractious problems The book concludes that virtue ethics can best guide parental decision making and that a new policymaking approach sketched here a navigational approach can best guide policymaking These approaches enable us to gain a rich understanding of the problems posed and to craft resolutions adequate to their challenges

The Argument of Supererogation and the Limits of Duty in Applied Ethics Marie-Luise Raters, 2025-09-30 Drawing on current research this book demonstrates that there are rational reasons for why certain actions should reasonably not be considered duties despite their moral value Would you do something unpleasant or dangerous you are not obliged to simply because it would benefit others I won't do this because I don't have to This argument of supererogation can be used to reject overly demanding moral expectations Yet the argument is not always equally convincing For instance refusing to donate a kidney is morally accepted Refusing a favor to a friend however seems indecent Perhaps supererogatory acts do not exist at all This book offers a refined framework for understanding the boundaries of moral duty It is of interest to students and scholars of moral philosophy applied ethics and meta ethics

The Essence of Islamist Extremism Irm Haleem, 2011-11-23 This book provides a conceptual analysis of Islamist extremism and examines radical Islamist rhetoric and various extremist groups Engaging in a conceptual analysis of Islamist extremism that focuses on the what is and not the why of Islamist extremism the book extends the traditional parameters of analysis from context specific and temporally confined causal analyses to a broader conceptual analysis relevant to the many different temporal and geo political contexts of Islamist extremist groups

Christian Philosophy A-Z Daniel Hill, 2006-07-21 A handy guide to the major figures and issues in Christian philosophy from Augustine to the present This volume covers a broad historical sweep and takes into account those non Christian

philosophers that have had a great impact on the Christian tradition However it concentrates on the issues that perplex Christian philosophers as they seek to think through their faith in a philosophical way and their philosophical beliefs in the light of their faith Examples of the topics discussed are the question of whether and how God knows the future whether we actually know that God exists and what Athens has to do with Jerusalem The leaders of the recent revival of Christian analytic philosophy especially Alvin Plantinga Nicholas Wolterstorff William Alston and Robert Adams are also included

Absolutism and Its Consequentialist Critics Joram Graf Haber,1994 a clear and sharp introduction which defines absolutism from both consequentialism and more moderate deontological views ETHICS Twentieth Century Forcible Child Transfers Ruth Amir,2018-11-27 The current surge of displaced and trafficked children child soldiers and child refugees rekindles the virtually dead letter of the Genocide Convention prohibition on transferring children of one group to another This book focuses on the gap between genocide as a legal term and genocidal forcible child transfer as a catastrophic experience that disrupts a group s continuity It probes the Genocide Convention s boundaries and draws attention to the diverse yet highly similar patterns of forcible child transfers cases such as colonial genocide in the US Canada and Australia Jewish Yemeni immigrants in Israel children of Republican parents during the Spanish Civil War and its aftermath and Operation Peter Pan in Cuba The analysis highlights the consequences of the under inclusive protection granted only to four groups Ruth Amir argues effectively for the need to add an Amending Protocol to the Genocide Convention to protect from forcible transfer to children of any identifiable group of persons perpetrated with the intent to destroy the group as such This proposed provision together with Communications and Rapid Inquiry Procedures will highlight the gravity of forcible child transfers and contribute to the prevention and punishment of genocide

Transnational Social Justice C. Cordourier-Real,2010-04-21 Critically examines theories of cosmopolitan justice grounded in the major traditions of moral philosophy Drawing upon the international ethics tradition this book presents an argument for the validity of obligations of social justice between countries *Ethics and the politics of food* Matthias Kaiser,Marianne Elisabeth Lien,2023-08-28 Food has emerged as a political topic par excellence It is increasingly involved in controversies at a transnational level in relation to issues of access dominance trade and control in a shared global environment At the same time innovations in biotechnology and animal domestication have brought ethics to the forefront of food debates Thus we live in an era when the ethics and the politics of food must come together This book addresses the ethics and the politics of food from a broad range of academic disciplines including sociology philosophy nutrition anthropology ethics political science and history The chapters expose novel problem areas and suggest guidelines for approaching them Topics range from fundamental issues in philosophy to sustainability from consumer trust in food to ethical toolkits Transparency power and responsibility are key concerns and special attention is given to animal welfare emerging technologies in food production and marine domestication Together the chapters represent a wide range of academic responses to the fundamental dilemmas

posed by food production and food consumption in the contemporary world
