Fralick,2001-06-27 How would you react if you went to sleep one night a young dentist beginning to build a successful practice to support your wife and two kids and woke up fuzzily seven months later to find that you were a different person You had a cast on your important right hand not because it was broken but because your brain wouldnt or couldnt send the signals to relax the muscles and your hand tried to curl into a fist Your right foot was pretty weak because your Achilles tendon had been cut and stretched so that your foot wouldnt curl up like your hand You had lost your sense of balance and your mind wouldnt allow you to speak without repeating your words so fast that your tongue couldnt keep up and people could no longer understand you without straining You had difficulty making decisions and you couldnt remember any decisions that you made To make things worse you saw

two or three or sometimes more images and your brain wouldn't integrate them into one Brad Fralick woke up in this way in 1994 His practice had been sold and his life was forever changed This book is a record of his remarkable journey toward thinking clearly again It might be called a book of short essays It is actually a chronology of his thoughts As Brad recovered he initially had to write his thoughts down because his short term memory was so bad that he couldn't sustain a thought train and he couldn't communicate verbally He couldn't straighten his right hand and couldn't control his left hand well enough to write with pen or pencil so he began to learn to type on a keyboard with one finger of his left hand We encouraged him to write everything that went through his head and he initially found it easier to write about a fictional character going through his own life experiences Later he began writing his views of politics religion and just about any aspect of life Writing was important to Brad's recovery but computer games have been even more instrumental Contemporary research suggests that mental activities with many arbitrary simple rules may help recovery of cognitive function Have you ever heard of a more enlightened description of computer games Hoping that a game or two would help put other broken brains back together we set up a web site to present comments on games as a sort of mental gymnasium or biofeedback treatment that's fun Brad wrote a few game reviews and then began to write about a fictional character Dr Sgt Milko a dentist who was an enlisted man in the Army As the fictional stories were written Brad published them on this web site in chronological order with most recent stories at the top of his table of contents These stories are collected in the second portion of this book THE MILKO STORIES They are published pretty much in reverse chronological order newest stories first Some make you laugh some make you cry and some just make you think They each reveal a new aspect of the recovery of his brain Surprisingly many of the stories are of adventures that actually took place years ago as Brad was growing up Brad's long term memory was not impaired by his brain injury Neither was his imagination Brad eventually began to publish his thoughts about contemporary life as a Traumatic Brain Injury survivor He added a new section to his web site to publish these comments The subject of his attention ranges from the wild fires that almost burned the Los Alamos national laboratory to his relationship with his son

Cold War Children's Television Vibiana Bowman Cvetkovic, 2023-10-16 *Cold War Children's Television* Philadelphia as a Case Study examines a culturally significant phenomenon of the Cold War the locally produced hosted children's show The Cold War era and the coming of age of commercial television were entwined not only chronologically but societally The era of the locally produced hosted show closed in the wake of Sesame Street due to shifts in social policy industry economics and rising expectations for children programming Through the lens of cultural and historical analysis this book reveals that beyond that nostalgia lies a vital visual form that thrived in the Cold War era one that reflected the ideals of childhood media and nation of a societal terrain from which the American children's television host emerged

The Selma Awakening Mark D. Morrison-Reed, 2014 The foremost scholar of African American Unitarian Universalist history presents this long awaited analysis of the denomination's civil rights activism in Selma Alabama in 1965 Selma represented a turning point for Unitarian Universalists In answering Martin Luther King Jr's call to action they shifted from passing earnest resolutions about racial justice to putting their lives on the line for the cause Morrison Reed traces the long history of race relations among the Unitarians and the Universalists leading up to 1965 exploring events and practices of the late nineteenth century and first half of the twentieth century He reveals the disparity between their espoused values on race and their values in practice And yet in 1965 their activism in Selma involving hundreds of ministers and the violent deaths of Rev James Reeb and Viola Liuzzo at last put them in authentic relationship with their proclaimed beliefs With rigorous scholarship and unflinching frankness *The Selma Awakening* provides a new way of understanding Unitarian Universalist engagement with race and offers an indispensable new resource for anyone interested in UU history

America-Lite David Gelernter, 2013-11-12 *America Lite* where we all live is just like America only turned into an amusement park or a video game or a supersized Pinkberry where the past and future are blank and there is only a big NOW How did we come to expect no virtue and so much cynicism from our culture our leaders and each other In this refreshingly judgmental book David Gelernter connects the historical dots to reveal a stealth revolution carried out by post religious globalist intellectuals who by and large can't run their own universities or scholarly fields but are very sure they can run you These imperial academics have deployed their students into the top echelon of professions once monopolized by staid and steady WASPs In this simple way they have installed themselves as the new designated drivers of American culture Imperial academics live in a world of theory they preach disdain for mere facts and for old fashioned fact based judgments like true or false Schoolchildren are routinely taught theories about history instead of actual history they learn for example that all nations are equally nice except for America which is nearly always nasty With academic experts to do our thinking for us we've politely shut up and let second raters take the wheel In fact we have handed the keys to the star pupil and teacher's pet of the post religious globalist intellectuals whose election to the presidency of the United States constituted the ultimate global

group hug How do we finally face the truth and get back into the driver s seat America Lite ends with a one point plan
