

STEM STITCH

Also known as **crystal stem**, **stem stitch** and **church window stitch**.

Stem stitch is one of the most frequently used embroidery stitches. It is quick and easy to work and follows intricate curves and linear designs well. Each stitch should be kept quite small and of an even size. A backwater needle can be made by inserting the needle into the fabric at a right angle, instead of directly into the hole in the fabric for the stitch.

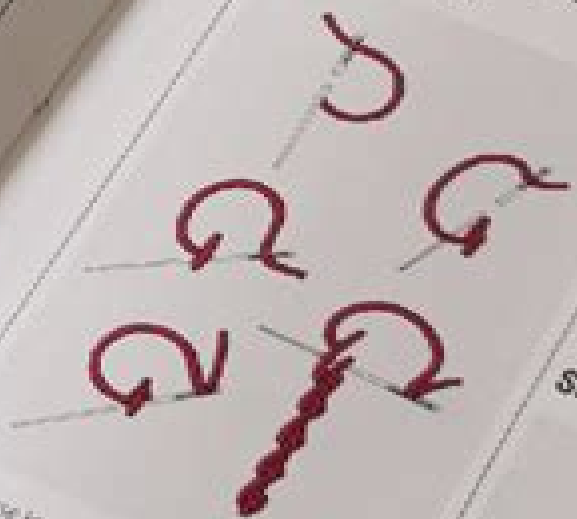

Work stem stitch upwards, with a small needle and backwater needle along the line. Always keep the working thread in front of the needle. When the thread is kept in the back of the needle, the effect of the stitch is slightly different and it is then known as **crystal stem stitch**.

WHIPPED STEM STITCH

Whipped stem stitch makes a stronger line than ordinary stem stitch (above). Use it when you want a heavy outline which will follow a complex design well. The stitch can be made more decorative if a contrasting colour and texture

PORTUGUESE KNOTTED STEM STITCH

Portuguese knotted stem stitch makes a knotted rope-like line which is accentuated when it is stitched in a thick, twisted thread such as periwinkle. This stitch is ideal for outlining designs where a heavy effect is required. Work this stitch using a backwater needle and a small needle.

or thread is used for the whipping element. The effect created by whipped stem stitch depends on the choice of whipping thread. Obtain a heavy, twisted thread in the same colour as the stem stitch you intend to use. The stitching looks like the work of a flat, twisted cotton or a contrasting colour produced in ordinary stem stitch.

First work a foundation row of ordinary stem stitch, then whip this line with a second thread without picking up any ground fabric. Use a third, more heavily twisted, for the whipping element to avoid pulling the stitches in the foundation line.

Outline stitch is a versatile product for outlining and for letter designs as it follows a single or multiple rows. The effect depends on the thread used, depending on the weight of the thread, the stitch should be kept quite even size, and should be really close to the fabric. Work this stitch in the same way as stem stitch, but always keep the working thread in front of the needle. The stitched will follow the outline of the design.
