An Architecture of Care in South Africa Nicholas Coetzer, 2023-07-10 Architects care It is foundational and germane to the discipline and practice of architecture This book charts the way the Arts and Crafts Movement established the moral ethos of an architecture of care that not only remains embedded in current discourse and practice but also that is being given a more vocal presence in our climate crisis and social justice world By way of genealogical strands the book charts the origin of architecture of care ideas in the Arts and Crafts Movement and their impact on the other progeny architectural projects in South Africa over the past hundred years These range from the translation of inglenooks into an armature architecture of Dignified Places in Cape Town's townships to the ethos of upliftment and care that translates from Octavia Hill through to correcting building regulations and eventually finding a less moralising and more transformative impact in the Hostels to Homes project The birth of design through context and climate in the Arts and Crafts Movement is demonstrated by the shift in South African houses from boxy cottages to solar and nature oriented ribbon plans as demonstrated through the work of Helmut Stauch and Norman Eaton The dislocation of Arts and Crafts ideas to the Cape also demonstrated a limit to the valorising of vernacular architecture and its against globalization building materials whereby English architects promoted Cape Dutch settler architecture and denigrated African vernacular architecture As a final genealogical strand the book demonstrates the coherence of moral instrumentality with the animism and affects potential of handmade buildings Written for academics students and researchers interested in architectural history it is an eye opening investigation into the role of architecture in society
