Calculating Speed

Speed can be determined quickly by means of the engraved tachymetric graduated bezel. As when measuring elapsed time, the push buttons must first be unscrewed and the sweep hand reset to zero. Next, start the timing sequence by pressing the upper push button. Push the same button once again when the predetermined distance - a kilometer or a mile (or other unit of measurement) - has been covered. You may then read the speed on the graduated bezel at the point where the sweep second hand has stopped. (In the photograph on the opposite page, it would be 54 km/hour or 54 miles/hour.)
