Countdown An Autobiography Silver Arrow Books:

Moon Bound Colin Burgess, 2013-03-12 Often lost in the shadow of the first group of astronauts for the Mercury missions the second and third groups included the leading figures for NASA's activities for the following two decades Moon Bound complements the author's recently published work Selecting the Mercury Seven 2011 extending the story of the men who helped to launch human spaceflight and broaden the American space program Although the initial 1959 group became known as the legendary pioneering Mercury astronauts the astronauts of Groups 2 and 3 gave us many household names Sixteen astronauts from both groups traveled to the Moon in Project Apollo with several actually walking on the Moon one of them being Neil Armstrong This book draws on interviews to tell the astronauts' personal stories and recreate the drama of that time It describes the process by which they were selected as astronauts and explains how the criteria had changed since the first group Moon Bound is divided into two parts recounting the biographies relating to the nine astronauts from NASA's Group 2 in the first part and the fourteen finalists in Group 3 in the second part The stories of both selection groups are narrated through the experiences of four finalists with interesting backgrounds One of these men is Al Rupp of the USAF who as a West Point cadet cheekily helped to steal the Navy mascot goat prior to the annual Army versus Navy game in 1953 thus achieving legendary status in the game's history Rupp was killed in a plane crash just two years after being named as a finalist for Group 3 The service career of naval aviator John Yamnicky was also very much the equal of other finalists but he was killed on September 11 2001 as he was a passenger on hijacked Flight 77 which was flown into the Pentagon At the end of the work there are several chapters on how these candidates were prepped for their missions **The Mission of a**

Lifetime Basil Hero, 2019-04-02 Award winning former investigative reporter Basil Hero chronicles the life lessons humanity can learn from the twelve remaining Apollo astronauts who went to the Moon In rare in depth interviews the twelve remaining lunar explorers for the first time talk at length about the real right stuff the true source of courage leadership and the quiet patriotism that it took to risk their lives going to the moon Hero begins each chapter with key life lessons that readers can gain from these honorable men whom he calls the Eagles He describes how they mastered their emotions and learned to conquer their fears through techniques that can be used from the classroom to the boardroom More importantly their voyages to the Moon led them to the most incredible discovery of all our home planet and its precious place in the universe They fear for Earth's future and offer sensible solutions to its mounting crises and the path to future space exploration In The Mission Of A Lifetime the Eagles share their wisdom and urge us to reframe our view of Earth to theirs no identifiable nations borders or races just Earthlings working together as a collective civilization Unbound Richard L Currier, 2017-08-08 Like Guns Germs and Steel a work of breathtaking sweep and originality that reinterprets the human story Although we usually think of technology as something unique to modern times our ancestors began to create the first technologies millions of years ago in the form of prehistoric tools and weapons Over time eight key technologies gradually

freed us from the limitations of our animal origins The fabrication of weapons the mastery of fire and the technologies of clothing and shelter radically restructured the human body enabling us to walk upright shed our body hair and migrate out of tropical Africa Symbolic communication transformed human evolution from a slow biological process into a fast cultural process The invention of agriculture revolutionized the relationship between humanity and the environment and the technologies of interaction led to the birth of civilization Precision machinery spawned the industrial revolution and the rise of nation states and in the next metamorphosis digital technologies may well unite all of humanity for the benefit of future generations Synthesizing the findings of primatology paleontology archeology history and anthropology Richard Currier reinterprets and retells the modern narrative of human evolution that began with the discovery of Lucy and other Australopithecus fossils But the same forces that allowed us to integrate technology into every aspect of our daily lives have also brought us to the brink of planetary catastrophe Unbound explains both how we got here and how human society must be transformed again to achieve a sustainable future Technology The deliberate modification of any natural object or substance with forethought to achieve a specific end or to serve a specific purpose **Apollo's Legacy** Roger D. Walters,2021-05-25 On January 27 1967 astronauts Gus Grissom Ed White and Roger Chaffee climbed into a new spacecraft perched atop a large Saturn rocket at Kennedy Space Center in Florida for a routine dress rehearsal of their upcoming launch into orbit then less than a month away All three astronauts were experienced pilots and had dreams of one day walking on the moon But little did they know nor did anyone else that once they entered the spacecraft that cold winter day they would never leave it alive The Apollo program would be perilously close to failure before it ever got off the ground But rather than dooming the space program

this tragedy caused the spacecraft to be completely overhauled creating a stellar flying machine to achieve the program's primary goal putting man on the moon Apollo 1 is a candid portrayal of the astronauts the disaster that killed them and its aftermath In it readers will learn How the Apollo 1 spacecraft was doomed from the start with miles of uninsulated wiring and tons of flammable materials in a pure oxygen atmosphere along with a hatch that wouldn't open How due to political pressure the government contract to build the Apollo 1 craft went to a bidder with an inferior plan How public opinion polls were beginning to turn against the space program before the tragedy and got much worse after Apollo 1 is about America fulfilling its destiny of man setting foot on the moon It's also about the three American heroes who lost their lives in the tragedy but whose lives were not lost in vain *In the Shadow of the Moon* Francis French, Colin Burgess, 2007-01-01 Tells the story of the exciting and challenging years in space flight with two superpowers engaged in a titanic struggle to land one of their own people on the moon This book explores the inspirations ambitions personalities and experiences of the select few whose driving ambition was to fly to the moon *An Annotated Bibliography of the Apollo Program* Roger D.
