Searles, 1999 Searles writing is a delight straightforward with a minimum of jargon The portraits of patients he draws are vivid humorous and compelling His greatest contribution has been perhaps his illumination of the basic humanity of the patient and the common ground between patient and therapist This volume represents the wisest and most humane of what contemporary psychoanalysis has to offer exemplified in the work of one of its most original contemporary practitioners Library Journal

The Still Small Voice Donald L. Carveth, 2018-05-01 Whereas Freud himself viewed conscience as one of the functions of the superego in The Still Small Voice Psychoanalytic Reflections on Guilt and Conscience the author argues that superego and conscience are distinct mental functions and that therefore a fourth mental structure the conscience needs to be added to the psychoanalytic structural theory of the mind He claims that while both conscience and superego originate in the so called pre oedipal phase of infant and child development they are comprised of contrasting and often conflicting identifications The primary object still most often the mother is inevitably experienced as on the one hand nurturing and soothing and on the other as frustrating and persecuting Conscience is formed in identification with the nurturer the superego in identification with the aggressor There is a principle of reciprocity at work in the human psyche for love received one seeks to return love for hate hate the talion law

Destruction and Creation Mary Ann Mattoon, 1999 The 14th Congress for Analytical Psychology was held 23-28 August 1998 in the ancient city of Florence Italy The theme Destruction and Creation Personal and Cultural Transformations is especially appropriate to the Italian setting with that nation's history of destruction both from nature and from human activity and its tradition especially in Florence of creative individuals and institutions The theme is fitting also to the context of Jungian psychology with its emphasis on these and other pairs of opposites with their integral role in psychic wholeness

Acknowledging also that destruction is indispensable to creation some Jungians prefer the term creative unconscious to the traditional collective unconscious

Psychosis, Psychoanalysis and Psychiatry in Postwar USA Orna Ophir, 2015-05-01

Covering the last four decades of the 20th century this book explores the unwritten history of the struggles between psychoanalysis and psychiatry in postwar USA inaugurated by the neosomatic revolution which had profound consequences for the treatment of psychotic patients Analyzing and synthesizing major developments in this critical and clinical field Orna Ophir discusses how leading theories redefined what schizophrenia is and how to treat it offering a fresh interpretation of the nature and challenges of the psychoanalytic profession The book also considers the internal dynamics and conflicts within mental health organizations their theoretical paradigms and therapeutic practices Opening a timely debate considering both the continuing relevance and the inherent limitations of the psychoanalytic approach the book demonstrates how psychoanalysts reinterpreted their professional identity by formalizing and disseminating knowledge among their fellow practitioners while negotiating with neighboring professions in the medical fields such as psychiatry pharmacology and the burgeoning neurosciences Chapters explore the ways in which psychoanalysts constructed and also transgressed upon the boundaries of their professional identity and practice as they sought to understand schizophrenia and treat its patients The book argues that among the many relationships psychoanalysis sustained with psychiatry some weakened their own social role as service providers while others made the theory and practice of psychoanalysis a viable contender in the jurisdictional struggles between professions Psychosis Psychoanalysis and Psychiatry in Postwar USA will appeal to researchers academics graduate students and advanced undergraduates who are interested in the history of psychoanalysis psychiatry the medical humanities and the history of science and ideas It will also be of interest to clinicians health care professionals and other practitioners

The Psychology of Today's Woman Toni Bernay, Dorothy Cantor, 2013-05-13

The sexual revolution oft discussed in the journalistic literature of recent years has brought in its wake a host of questions that are only beginning to be addressed How are women coping with real world challenges for which they may be ill prepared both socially and psychologically How successfully are they integrating old and new ego ideals in forging new identities Is their ostensible liberation actually making for a sense of integration and wholeness The Psychology of Today's Woman New Psychoanalytic Visions probes these and related questions from the standpoint of both developmental and therapeutic concerns Taking Freud's notion of female sexuality as a point of departure editors Bernay and Cantor have compiled a collection of original essays that reassesses traditional conceptions of female psychology Section I proffers new visions of femininity Section II and explores critical situations in the lives of contemporary women Section III A final section of the book of special interest to analysts and psychotherapists examines the various facets of the clinical treatment of women Collectively the contributors to this volume articulate a strong challenge to the deficiency model of female identity that has long dominated psychoanalytic theory More impressively still they offer constructive alternatives to the preconceptions of the past They converge in the

belief that the richness and diversity of female experience cannot be encompassed in the overly simplified definitions and masculine analogizing of classical analysis Whether we investigate the status of masculinity and femininity as personality traits the relationship between nurturance and aggression in female identity or the meaning of normality and pathology in treatment situations we are very much in a realm of multiple truths in which the formulas of the past give little sense of the options of the present or the possibilities of the future
