Cinema In The Digital Age:

Experimental Cinema in the Digital Age Malcolm Le Grice, 2002-05-26 Michael Le Grice a pioneer of structural film in the 1970s and whose first video and computer works were exhibited in the late 1960s provides a collection of his most notable essays The essays shed light on the work of other artists and film makers and documents a period especially the 70s when artists film was at the centre of polemical debate about the nature of avant garde and the future of radical or experimental film The book contributes to the contemporary debates about film video art and new technology Cinema in the Digital Age Nicholas Rombes, 2017 This updated edition of Cinema in the Digital Age takes a fresh look at the state of digital cinema It pays special attention to the ways in which nostalgia for the look and feel of analogue disrupts the aesthetics of the digital image and examines how recent films have disguised and erased their digital foundations Japanese Cinema in the Digital Age Mitsuyo Wada-Marciano, 2012-05-31 This book deliberates on the role of the transnational in bringing to the mainstream what were formerly marginal Japanese B movie genres *The End of Celluloid* Matt Hanson, 2004 Explores the diverse and inspirational works of filmmakers such as Lars Von Trier Spike Jonze and David Lynch as well as computer game creators music pioneers and commercial directors The author highlights how new techniques and innovative talent are infiltrating the mainstream **The End of Cinema?** André Gaudreault, Philippe Marion, 2015-04-14 Is a film watched on a video screen still cinema Have digital compositing motion capture and other advanced technologies remade or obliterated the craft Rooted in their hypothesis of the double birth of media Andr Gaudreault and Philippe Marion take a positive look at cinema s ongoing digital revolution and reaffirm its central place in a rapidly expanding media landscape The authors begin with an overview of the extreme positions held by opposing camps in the debate over cinema the digitalphobes who lament the implosion of cinema and the digitalphiles who celebrate its new vital incarnation Throughout they remind readers that cinema has never been a static medium but a series of processes and transformations powering a dynamic art From their perspective the digital revolution is the eighth major crisis in the history of motion pictures with more disruptions to come Brokering a peace among all sides Gaudreault and Marion emphasize the cultural practice of cinema over rigid claims on its identity moving toward a common conception of cinema to better understand where it is headed next The Filmmaker's Handbook Steven Ascher, 2012-11-27 The authoritative guide to producing directing shooting editing and distributing your video or film Whether you aspire to be a great filmmaker yourself or are looking for movie gifts this comprehensive guide to filmmaking is the first step in turning a hobby into a career Widely acknowledged as the bible of video and film production and used in courses around the world The Filmmaker s Handbook is now updated with the latest advances in HD and digital formats For students and teachers professionals and novices this indispensable handbook covers all aspects of movie making Techniques for making dramatic features documentaries corporate broadcast and experimental videos and films Shooting with DSLRs video film and digital cinema cameras In depth coverage of lenses lighting sound recording editing and mixing

Grice, 2001 From IBM to MGM Andrew Utterson, 2019-07-25 Andrew Utterson's unique study charts the beginnings of
digital cinema addressing both how filmmakers used new digital technologies and how attitudes and anxieties about the rise
of the computer were represented in films such as Lang's Desk Set Godard's Alphaville Kubrick's 2001 A Space Odyssey and
Crichton's Westworld **Japanese Cinema in the Digital Age** Mitsuyo Wada-Marciano, 2012-05-31 Digital technology has
transformed cinema's production distribution and consumption patterns and pushed contemporary cinema toward
increasingly global markets In the case of Japanese cinema a once moribund industry has been revitalized as regional genres
such as anime and Japanese horror now challenge Hollywood's preeminence in global cinema In her rigorous investigations
of J horror personal documentary anime and ethnic cinema Mitsuyo Wada Marciano deliberates on the role of the
transnational in bringing to the mainstream what were formerly marginal B movie genres She argues persuasively that
convergence culture which these films represent constitutes Japan's response to the variegated flows of global economics
and culture With its timely analysis of new modes of production emerging from the struggles of Japanese filmmakers and
animators to finance and market their work in a post studio era this book holds critical implications for the future of other
national cinemas fighting to remain viable in a global marketplace As academics in film and media studies prepare a
wholesale shift toward a transnational perspective of film Wada Marciano cautions against jettisoning the entire national
cinema paradigm Discussing the technological advances and the new cinematic flows of consumption she demonstrates that
while contemporary Japanese film on the one hand expresses the transnational as an object of desire i e a form of total
cosmopolitanism on the other hand that desire is indeed inseparable from Japan's national identity Drawing on a substantial
number of interviews with auteur directors such as Koreeda Hirokazu Kurosawa Kiyoshi and Kawase Naomi and incisive
analysis of select film texts this compelling original work challenges the presumption that Hollywood is the only authentically
global cinema
