Cities And Climate Change Routledge Studies In Physical Geography And Environment:

Routledge studies in physical geography and environment Harriet Bulkeley, 2006 Cities and Climate Change Harriet Bulkeley, Michele Merrill Betsill, 2003 **Cities and Climate Change** Michelle Betsill, Harriet Bulkeley, 2003-08-27 Climate change is one of the most challenging issues of our time As key sites in the production and management of emissions of greenhouse gases cities will be crucial for the implementation of international agreements and national policies on climate change This book provides a critical analysis of the role of cities in addressing climate change and the prospects for urban sustainability Cities and Climate Change is the first in depth analysis of the role of cities in addressing climate change The book argues that key challenges concerning the resources and powers of local government as well as conflicts between local goals for economic development and climate change mitigation have restricted the level of local action on climate change These findings have significant implications for the prospects of mitigating climate change and achieving urban sustainability This book provides a valuable interdisciplinary analysis of these issues and will appeal to students and researchers interested in sustainability at local and global scales **Orchestrating Local Climate Policy in the European Union** Lena Bendlin, 2019-05-13 Can we sidestep tedious climate policy negotiations and forge a coalition of the willing instead Many international organizations and scholars hope to spur local climate action by orchestration indirect and voluntary governance arrangements Lena Bendlin looks beyond the apparent success of voluntary initiatives using the example of the Covenant of Mayors often heralded as an exemplary multi level EU initiative Five in depth case studies show why how and with what difficulties local governments engage in this voluntary commitment scheme The analysis identifies durability intensity and causality as crucial building blocks for more cautious orchestration theorizing and derives recommendations for appropriate incentives and support at the regional national and international level **Reinterpreting Sub-Saharan Cities through the Concept of Adaptive Capacity** Liana Ricci, 2015-12-30 This book explores whether and how a reinterpretation of Sub Saharan cities through the concept of adaptive capacity could bridge this distance and contribute to a new understanding of the contemporary city The research contributes to improved knowledge of urban and environmental planning and of the dynamics of development and environmental management in peri urban areas of Dar es Salaam This knowledge highlights the limits of certain common generalizations on the character of peri urban areas Moreover the research provides methodological contribution derived from considerations on the strengths and weakness of tools and methods for investigating adaptive capacity and for environmental management in the city of Dar es Salaam Finally it highlights controversial issues and possible research paths related to the relationship between adaptive capacity and urban and environmental planning **Routledge Handbook on the Green New Deal** Kyla Tienhaara, Joanna Robinson, 2022-08-26 In recent years the Green New Deal has moved from relative obscurity to front and centre of policy discussions and public debates about how to respond to the climate crisis It has been credited with radically changing the nature of the

conversation on climate change and with re energizing the environmental movement at a critical time All Green New Deal proposals share an emphasis on the need for governments rather than markets to lead the energy transition However they differ in other respects This Handbook analyses the fundamentals underlying all Green New Deals as well as exploring national and regional variations It is divided into three parts The first part examines the political economy of the Green New Deal focussing not just on how proposals will be costed but also on opportunities for a fundamental transformation of both national economies and the global economic system The second part explores issues of justice which are central to many Green New Deal proposals including Indigenous rights racial and gender equity and justice for the Global South In the third part authors detail case studies of Green New Deal proposals and plans at the local national and regional level This book will be an invaluable research and reference volume for students and scholars in economics politics sociology geography and environmental studies It should also be of interest to those actively involved in climate and environmental policymaking

Governing the Climate Johannes Stripple, Harriet Bulkeley, 2014 The first volume on critical social and political studies of climate change for advanced students researchers and policy makers

A Better Way to Zone Donald L. Elliott, 2012-09-26 Nearly all large American cities rely on zoning to regulate land use According to Donald L Elliott however zoning often discourages the very development that bigger cities need and want In fact Elliott thinks that zoning has become so complex that it is often dysfunctional and in desperate need of an overhaul A Better Way to Zone explains precisely what has gone wrong and how it can be fixed A Better Way to Zone explores the constitutional and legal framework of zoning its evolution over the course of the twentieth century the reasons behind major reform efforts of the past and the adverse impacts of most current city zoning systems To unravel what has gone wrong Elliott identifies several assumptions behind early zoning that no longer hold true four new land use drivers that have emerged since zoning began and basic elements of good urban governance that are violated by prevailing forms of zoning With insight and clarity Elliott then identifies ten sound principles for change that would avoid these mistakes produce more livable cities and make zoning simpler to understand and use He also proposes five practical steps to get started on the road to zoning reform While recent discussion of zoning has focused on how cities should look A Better Way to Zone does not follow that trend Although New Urbanist tools form based zoning and the SmartCode are making headlines both within and outside the planning profession Elliott believes that each has limitations as a general approach to big city zoning While all

three trends include innovations that the profession badly needs they are sometimes misapplied to situations where they do not work well In contrast A Better Way to Zone provides a vision of the future of zoning that is not tied to a particular picture of how cities should look but is instead based on how cities should operate
