Notes to Table C4.36.

Convergent flow at junctions

Where the velocity of flow in one branch of a tee, at a converging junction, is high relative to the velocity in the other, the pressure loss factor for the latter may be negative due to the injection effect.

Tapers

Where the included angle is 10° or less, take a factor of 0.2 for an enlargement and ignore for a contraction.

Pipes

Individual designs may show wide variations over the values tabulated.

Radiators

The resistance to flow through a cast iron column radiator with 5 columns may be approximated by: $p = 5730 \Delta p^1.5^{0.8}$

Specialist equipment

Manufacturers' data should be consulted in these cases.

Cibse Guide C4:

CIBSE Guide H: Building Control Systems Cibse, 2007-06-01 Building Control Systems provides the building services engineer with a comprehensive understanding of modern control systems and relevant information technology. This will ensure that the best form of control systems for the building is specified and that proper provision is made for its installation, commissioning, operation and maintenance. Beginning with an overview of the benefits of the modern building control system, the authors describe the different controls and their applications and include advice on their set up and tuning for stable operation. There are chapters on the practical design of control systems, how to work from the hardware components and their inclusion in networks through to control strategies in Heating, Ventilation and Air Conditioning (HVAC) systems and whole buildings. The relationship between Building Management Systems (BMS) and information technology systems is discussed and the building procurement process and the importance of considering control requirements at an early stage in the design process.

A Whole-System Approach to High Performance Green Buildings David Strong, Victoria Burrows, 2016-12-31 This authoritative new resource provides a comprehensive review of the current approaches to the design and construction of sustainable buildings. This hand-on guide features global case studies with practical examples of both successful and unsuccessful designs. The whole system approach to integrated design is clearly presented. This book includes insight into designing for the future, including design quality and future proofing intelligent buildings and whole life value. Nature-inspired sustainable designs that can be mimicked in the construction industry are presented. Technical challenges such as energy efficiency, design and computer modeling are explored along with various construction phase opportunities.

CIBSE Guide C: Reference Data Cibse, 2007-06-07 Guide C Reference Data contains the basic physical data and calculations which form the crucial part of building services engineer background reference material. Expanded and updated throughout, the book contains sections on the properties of humid air, water and steam, on heat transfer, the flow of fluids in pipes and ducts, and fuels and combustion, ending with a comprehensive section on units, mathematical and miscellaneous data. There are extensive and easy-to-follow tables and graphs.

Building Energy Management Systems Geoff Levermore, 2013-07-04 Energy management systems are used to monitor building temperature inside and outside buildings and control the boilers and coolers. Energy efficiency is a major cost issue for commerce and industry and of growing importance on university syllabuses. Fully revised and updated, this text considers new developments in the control of low energy and HVAC systems and contains two new chapters. Written for practising engineers, essential for control engineers and energy managers, in addition to being essential reading for under postgraduate courses in building services and environmental engineering.

Air Conditioning Application and Design W.P. Jones, 2012-11-12 Intended for advanced students of building services, this practical book describes the design of air conditioning systems. Readers are assumed to have a knowledge of the basic principles of air conditioning which are covered in the companion volume *Air Conditioning*.

Engineering This new edition takes account of the latest building codes and pays greater attention to energy conservation The section on systems characteristics is expanded and extensively revised to take account of developments in the technology of air conditioning since publication of the previous edition There are expanded sections on specialist applications such as systems for clean rooms in the semiconductor industry The author has wide experience both in lecturing on the subject and in the practical design and installation of air conditioning systems **Heating and Water Services Design in Buildings**

Keith Moss, Keith J Moss, 2013-05-13 This book provides a thorough and practical coverage of design procedures with numerous examples and case studies The author has worked with open learning candidates of all ages as well with college students and university undergraduates Heat and Mass Transfer in Building Services Design Keith Moss, 2002-09-11

Building design is increasingly geared towards low energy consumption Understanding the fundamentals of heat transfer and the behaviour of air and water movements is more important than ever before Heat and Mass Transfer in Building Services Design provides an essential underpinning knowledge for the technology subjects of space heating water services ventilation and air conditioning This new text provides core understanding of heat transfer and fluid flow from a building services perspective complements a range of courses in building services engineering underpins and extends the themes of the author's previous books Heating and Water Services Design in Buildings Energy Management and Operational Costs in Buildings Heat and Mass Transfer in Building Services Design combines theory with practical application for building services professional and students It will also be beneficial to technicians and undergraduate students on courses in construction and mechanical engineering *Plumbing* Roy D. Treloar, 2011-12-27 The 4th edition of Plumbing continues to provide the definitive single volume text on plumbing heating and gas installation work ideal for students working towards their Diploma in plumbing or NVQ SVQ at levels 2 and 3 Highly illustrated and easy to read and understand it tackles plumbing topic by topic in double page spreads with text full colour illustrations and clear photographs enabling the reader to grasp the essentials quickly and easily This approach ensures it also provides a concise reference for the trained plumber Special features include concise text many clear full colour illustrations around 140 photographs topics focussed on the needs of NVQ SVQ levels 2 and 3 additional topics beyond levels 2 and 3 a self assessment section a problem solving section This new edition has been thoroughly updated to take account of changes to the Building Regulations including changes to the following approved documents Part F Ventilation Part G Sanitation hot water safety and water efficiency Part H Drainage and waste disposal Part L Conservation of fuel and power and Part P Electrical safety A significant new section on energy conservation sustainability has been added and additional related material introduced where relevant The extensive coverage with new full colour illustrations to enhance legibility and understanding and the emphasis on safety in the work place ensure this remains the definitive single volume for both student and trained plumbers **Heat and Mass Transfer in**

Buildings Keith J. Moss, 2015-03-17 The second edition of this reliable text provides readers with a thorough understanding

of the design procedures that are essential in designing new buildings and building refurbishment Covering the fundamentals of heat and mass transfer as essential underpinning knowledge this edition has been thoroughly updated and reflects the need for new building design and building refurbishment to feature low energy consumption and sustainable characteristics New additions include extended and updated worked examples two new appendices covering renewable energy systems and sustainable building engineering with startling conclusions This book is an invaluable guide for HND and degree level students of building services engineering as well as building built environment building engineering and architecture courses

Air Conditioning Engineering W Peter Jones, 2007-08-31 Designed for students and professional engineers the fifth edition of this classic text deals with fundamental science and design principles of air conditioning engineering systems W P Jones is an acknowledged expert in the field and he uses his experience as a lecturer to present the material in a logical and accessible manner always introducing new techniques with the use of worked examples
