China may be able to disrupt or even access the wireless networks that carry our medical financial and even military communications This insider story from a telecommunications veteran uncovers how we got into this mess and how to change the outcome In *Wireless Wars China s Dangerous Domination of 5G and How We re Fighting Back* author Jon Pelson explains how America invented cellular technology taught China how to make the gear and then handed them the market Pelson shares never before told stories from the executives and scientists who built the industry and describes how China

undercut and destroyed competing equipment makers freeing themselves to export their nation's network gear and their surveillance state. He also reveals China's successful program to purchase the support of the world's leading political business and military figures in their effort to control rival nations' networks. What's more, Pelson draws on his lifelong experience in the telecommunications industry and remarkable access to the sector's leaders to reveal how innovative companies can take on the Chinese threat and work with counterintelligence and cybersecurity experts to prevent China from closing the trap.
