Cities Under Siege The New Military Urbanism:

Cities Under Siege Stephen Graham, 2011-11-01 Cities are the new battleground of our increasingly urban world From the slums of the global South to the wealthy financial centers of the West Cities Under Siege traces the spread of political violence through the sites spaces infrastructure and symbols of the world s rapidly expanding metropolitan areas Drawing on a wealth of original research Stephen Graham shows how Western militaries and security forces now perceive all urban terrain as a conflict zone inhabited by lurking shadow enemies Urban inhabitants have become targets that need to be continually tracked scanned and controlled Graham examines the transformation of Western armies into high tech urban counter insurgency forces He looks at the militarization and surveillance of international borders the use of security concerns to suppress democratic dissent and the enacting of legislation to suspend civilian law In doing so he reveals how the New Military Urbanism permeates the entire fabric of urban life from subway and transport networks hardwired with high tech command and control systems to the insidious militarization of a popular culture corrupted by the all pervasive discourse of terrorism

criminology sociology surveillance studies human and social geography and urban studies and planning The Architecture of Phantasmagoria Libero Andreotti, Nadir Lahiji, 2016-11-10 In a time of mass mediated modernity the city becomes almost by definition a constitutively mediated city Today more than ever before the omnipresence of media in every sphere of culture is creating a new urban ontology saturating fracturing and exacerbating the manifold experience of city life The authors describe this condition as one of hyper mediation a qualitatively new phase in the city's historical evolution The concept of phantasmagoria has pride of place in their study using it as an all embracing explanatory framework they explore its meanings as a critical category to understand the culture and the architecture of the contemporary city Andreotti and Lahiji argue that any account of architecture that does not include understanding the role and function of media and its impact on the city in the present tele technological capitalist society is fundamentally flawed and incomplete Their approach moves from Walter Benjamin through the concepts of phantasmagoria and of media as theorized also by Theodor Adorno Siegfried Kracauer and a new generation of contemporary critics towards a new socio critical and aesthetic analysis of the mediated space of the contemporary city China's Soft War on Terror Tianyang Liu, 2021-11-29 This book explores how the Chinese government reasserts its control and management of public spaces as part of its overall counter terrorism strategy The work focuses primarily on the banal and alternative forms that China's war on terror takes the everyday non military socio economic and spatio material It presents three different cases of control associated with the state's effort to manage material social and digital public spaces as remedies to terrorism and ethnic unrest in China the redevelopment project of Kashgar the home of Uyghur culture from 2001 to 2017 the forging of local partnerships with potential agents i.e. the local cadres and imams in Xinjiang as part of the process of implementing counter terrorism policies and an online campaign about international terrorism that appeared on Sina Weibo Using securitization theory as a theoretical framework the book establishes links between human geography and critical security studies and advances the understanding of non confrontational forms of resistance in China It also focuses attention on the binary relationship between the securitizing agency of the state and the counter securitization agency of terrorists while also exploring the manner in which other societal forces interact with these processes This book will be of interest to students of critical terrorism studies Chinese studies human geography and security studies Tug of War Jocelyn Wills, 2017-09-04 Selling Earth observation satellites on their abilities to predict and limit adverse environmental change politicians business leaders the media and technology enthusiasts have spent sixty years arguing that space exploration can create a more peaceful prosperous world Capitalist states have also socialized the risk and privatized the profits of the commercial space industry by convincing taxpayers to fund surveillance technologies as necessary components of sovereignty freedom and democracy Jocelyn Wills's Tug of War reminds us that colonizing the cosmos has not only accelerated the arms race but also encouraged government contractors to compete for the military and commercial spoils of surveillance Although Canadians prefer to celebrate their role as purveyors

of peaceful space applications Canada has played a pivotal part in the expansion of neoliberal policies and surveillance networks that now encircle the globe primarily as a political ally of the United States and component supplier for its military industrial complex Tracing the forty five year history of Canada s largest space company MacDonald Dettwiler and Associates MDA through the lens of surveillance studies and a trove of oral history transcripts government documents trade journals and other sources Wills places capitalism s imperial ambitions squarely at the centre of Canada US relations and the privatization of the Canadian political economy Tug of War confronts the mythic lure of technological progress and the ways in which those who profess little interest in war rationalize their leap into military contracting by avoiding the moral and political implications of their work

Resilience & the City Peter Rogers,2016-04-08 Following the turbulent events of the first few years of the 21st century the growth of new security and disaster measures have led to significant changes to urban design and the management of urban space This book blends the genealogical method of Foucault with the theory of rhythms by Lefebvre to examine these changes The spatial history of urban disaster is linked to the rhythms of everyday urban experience to offer a revised understanding of the regulation of order and disorder in the city In doing so the book highlights issues of hardening space the drift from civil defence to civil protection to civil contingencies and resilience this assessment realigns the potential impact of tightening security practices and resilient ways of thinking doing and acting on societal security This also links to growing concerns about quality of life over the use and potential abuse of security and disaster legislation for managing social unrest Examples studied include the increased exclusion of minorities such as young people from democracy and public life security oriented interventions in the ethnic

minority communities the use of automated technologies in policing civil and minor offences e g digital plate recognition and speeding and the interplay of diverse social groups in more commercially aligned and increasingly securitised public spaces of the entrepreneurial city This book highlights many significant problems with the direction of British democracy and suggests there may be both positive and negative results from becoming more resilient While providing a critical appraisal of the realignment of neoliberal democracy at large it also links discussion on gentrification revanchism and urban security to a forward looking agenda for further research
