Degrowth A Vocabulary For A New Era:

Degrowth Giacomo D'Alisa, Federico Demaria, Giorgos Kallis, 2014-11-13 Degrowth is a rejection of the illusion of growth and a call to repoliticize the public debate colonized by the idiom of economism It is a project advocating the democratically led shrinking of production and consumption with the aim of achieving social justice and ecological sustainability This overview of degrowth offers a comprehensive coverage of the main topics and major challenges of degrowth in a succinct simple and accessible manner In addition it offers a set of keywords useful for intervening in current political debates and for bringing about concrete degrowth inspired proposals at different levels local national and global The result is the most comprehensive coverage of the topic of degrowth in English and serves as the definitive international reference More information at vocabulary.degrowth.org View the author spotlight featuring events and press related to degrowth at <http://t.co/k9qbQpyuYp> [Towards a Political Economy of Degrowth](#), Ekaterina Chertkovskaya,, Alexander Paulsson, Stefania Barca, 2019-10-04 Since the 1970s the degrowth idea has been proposed by scholars public intellectuals and activists as a powerful call to reject the obsession of neoliberal capitalism with economic growth an obsession which continues apace despite the global ecological crisis and rising inequalities In the past decade degrowth has gained momentum and become an umbrella term for various social movements which strive for ecologically sustainable and socially just alternatives that would transform the world we live in How to move forward in an informed way without reproducing the existing hierarchies and injustices How not to end up in a situation when ecological sustainability is the prerogative of the privileged direct democracy is ignorant of environmental issues and localisation of production is xenophobic These are some of the questions that have inspired this edited collection Bringing degrowth into dialogue with critical social theories covering previously unexplored geographical contexts and discussing some of the most contested concepts in degrowth the book hints at informed paths towards socio ecological transformation [Who Will Build the Ark?](#) Lola Seaton, Benjamin Kunkel, 2023-06-27 What ecological politics should the left propose In *Who Will Build the Ark* leading radical thinkers debate left alternatives to runaway global heating capitalist crisis and wider environmental breakdown clarifying the stakes in today's key disputes between Green New Deal supporters and proponents of degrowth In a series of landmark texts first published by New Left Review Herman Daly and Benjamin Kunkel discusses the possibility of an egalitarian steady state economy while Robert Pollin warns against the worldwide slump degrowth could bring and calls instead for a single issue campaign 2 per cent of global GDP dedicated to the switch to renewable energy as the swiftest solution to the emissions crisis Nancy Fraser envisages an eco socialist exit from capitalism's multifold crises while Troy Vettese advocates eco austerity and half earth rewilding Lola Seaton draws out the strategic implications of these contested perspectives in a set of unavoidable green questions In the realm of contemporary politics Alyssa Battistoni writes on the dead end of COP diplomacy Cdric Durand asks whether energy shortages will derail the transition away from fossil fuels and Thomas Meaney compares Green New

Deal proposals to the pinched reality of Biden's Inflation Reduction Act The world's major powers accept the likelihood of dangerous climate change yet seem incapable of averting it Can radical green models generate the social leverage needed to do so Or as Mike Davis puts it Who will build the Ark *Eco-Social Transformation and Community-Based Economy* Susanne Elsen, 2018-12-07 Worldwide societal problems such as mass unemployment growing social disparities public and private poverty social exclusion environmental destruction and the evidence of climate change are increasing and becoming ever more visible They require urgent and sustainable long term solutions Eco Social Transformation and Community Based Economy provides a transdisciplinary conception of community based socially productive approaches to eco social transformation and sustainability It introduces interdisciplinary discourses basic theoretical concepts participatory and community based research development strategies and practical prospects and considers them in the context of both eco social transformation and eco social work especially with disadvantaged groups With case studies that demonstrate the creative power of local embeddedness diversity and cooperation this book presents integrative local approaches as convincing examples of possible ways forward It will be of interest to all scholars students and activists working in community development social development social work and human geography **International Development** Corinna R. Unger, 2018-09-06

International Development A Postwar History offers the first concise historical overview of international development policies and practices in the 20th century Embracing a longue durée perspective the book describes the emergence of the development field at the intersection of late colonialism the Second World War the onset of decolonization and the Cold War It discusses the role of international organizations colonial administrations national governments and transnational actors in the making of the field and it analyzes how the political intellectual and economic changes over the course of the postwar period affected the understanding of and expectations toward development By drawing on examples of development projects in different parts of the world and in different fields Corinna R Unger shows how the plurality of development experiences shaped the notion of development as we know it today This book is ideal for scholars seeking to understand the history of development assistance and to gain new insight into the international history of the 20th century

Environment, Power, and Justice Graeme Wynn, Jane Carruthers, Nancy J. Jacobs, 2022-07-26 Spanning the colonial postcolonial and postapartheid eras these historical and locally specific case studies analyze and engage vernacular activist and scholarly efforts to mitigate social environmental inequity This book highlights the ways poor and vulnerable people in South Africa Lesotho and Zimbabwe have mobilized against the structural and political forces that deny them a healthy and sustainable environment Spanning the colonial postcolonial and postapartheid eras these studies engage vernacular activist and scholarly efforts to mitigate social environmental inequity Some chapters track the genealogies of contemporary activism while others introduce positions actors and thinkers not previously identified with environmental justice Addressing health economic opportunity agricultural policy and food security the chapters in this book explore a range of issues and ways of

thinking about harm to people and their ecologies Because environmental justice is often understood as a contemporary phenomenon framed around North American examples these fresh case studies will enrich both southern African history and global environmental studies Environment Power and Justice expands conceptions of environmental justice and reveals discourses and dynamics that advance both scholarship and social change Contributors Christopher Konz Marc Epprecht Mary Galvin Sarah Ives Admire Mseba Muchaparara Musemwa Matthew A Schnurr Cherryl Walker **The Political Economy of the Low-Carbon Transition** Peadar Kirby,Tadhg O'Mahony,2017-10-26 This book addresses the global need to transition to a low carbon society and economy by 2050 The authors interrogate the dominant frames used for understanding this challenge and the predominant policy approaches for achieving it Highlighting the techno optimism that informs our current understanding and policy options Kirby and O Mahony draw on the lessons of international development to situate the transition within a political economy framework Assisted by thinking on future scenarios they critically examine the range of pathways being implemented by both developed and developing countries identifying the prevailing forms of climate capitalism led by technology Based on evidence that this is inadequate to achieve a low carbon and sustainable society the authors identify an alternative approach This advance emerges from community initiatives discussions on postcapitalism and debates about wellbeing and degrowth The re positioning of society and environment at the core of development can be labelled ecosocialism a concept which must be tempered against the conditions created by Trumpism and Brexit

Development as Service Dorine E. van Norren,2025-08-05 This refreshing account of comparative wellbeing perspectives of the Global South of Ubuntu Buen Vivir and Gross National Happiness sheds a new light on sustainable development debates arguing for the notion of culture underlying all development Instead of Development as Freedom it proposes Development as Service centering around reciprocity The central Sustainable Development Goals perspective of Leaving no one behind and sustainable growth is still caught in the development logic of linear growth individualism and the hierarchy of developed versus developing states This book is a must read for philosophers who are willing to think beyond European philosophy new economists interested in reshaping today s paradigms innovative lawyers with an environmental heart or human rights interest and all people who seek new meaning in today s society as well as for those who yearn for a dialogue between worldviews of the Global South and science **Inhabiting the Earth** Martin Locret-Collet,Simon Springer,Jennifer Mateer,Maleea Acker,2021-10-25 Over the last several decades scholars and practitioners have progressively acknowledged that we cannot consider cities as the place where nature stops anymore resulting in urban environments being increasingly appreciated and theorized as hybrids between nature and culture entities made of socio ecological processes in constant transformation Spanning the fields of political ecology environmental studies and sociology this new direction in urban theory emerged in concert with global concern for sustainability and environmental justice This volume explores the notion that connecting with nature holds the key to a more progressive and liberatory politics

Marketing in the Climate Crisis Carys Egan-Wyer, Jon Bertilsson, 2025-08-07 Are marketers the proponents for continuous economic growth the ultimate climate criminals So far their job has been to create unnecessary demand and to promote the overconsumption and waste that threatens our very existence on this planet In this book however the authors explore the potential of marketing to do the opposite that is to help create a more ecologically sustainable future This book argues that marketing researchers and practitioners have a crucial role to play in reimagining and promoting alternatives to growth capitalism Existing sustainability narratives focus on sacrifice and limitation rendering potential futures uninspiring and unappealing Drawing on critical marketing scholarship and degrowth principles this book proposes an alternative way of thinking dystopian optimism which allows us to imagine degrowth as desirable The authors suggest that the transition to a post growth future can be achieved by theoretically reimagining that future and outline practical ways for critical marketers to contribute to this transition This book adds to the small but growing stream of marketing literature that concerns itself with marketing's role in the currently unfolding ecological calamity Marketers and marketing researchers will learn how marketing's role in the calamity is threatening its legitimacy but by following the chapter by chapter analysis they will also learn how marketing can transform itself by focusing on selling sustainable futures This book is essential reading for those who want to understand why it is so hard for us to imagine desirable sustainable futures and who want to be part of changing that For those who are interested in saving not just marketing's legitimacy but also the planet it is a must read for scholars and upper level students of critical marketing marketing ethics marketing theory and consumer culture
