Agarwal, Martin Bohner, Abdullah Özbekler, 2021-04-12 This book provides an extensive survey on Lyapunov type inequalities It summarizes and puts order into a vast literature available on the subject and sketches recent developments in this topic In an elegant and didactic way this work presents the concepts underlying Lyapunov type inequalities covering how they developed and what kind of problems they address This survey starts by introducing basic applications of Lyapunov's inequalities It then advances towards even order odd order and higher order boundary value problems Lyapunov and Hartman type inequalities systems of linear nonlinear and quasi linear differential equations recent developments in Lyapunov type inequalities partial differential equations linear difference equations and Lyapunov type inequalities for linear half linear and nonlinear dynamic equations on time scales as well as linear Hamiltonian dynamic systems Senior undergraduate students and graduate students of mathematics engineering and science will benefit most from this book as well as researchers in the areas of ordinary differential equations partial differential equations difference equations and dynamic equations Some background in calculus ordinary and partial differential equations and difference
