On Society Anthony Elliott, Bryan S. Turner, 2013-08-26 Society is one of the most frequently used words in public life it is also a foundational term in the social sciences In our own time however the idea has never been so much in dispute and so little understood For some critics society is simply too consensual for a world of intensive discord For others the idea of society is oppressive the very notion so some argue is dismissive of the infinite social differences that shape global realities In this erudite and original book two of the world s leading social theorists focus on unravelling the different meanings of society as a way of introducing the reader to contemporary debates in social theory The authors argue provocatively that all ideas of society can be assigned to one of three analytical categories or some combination of these structure solidarity or creation and develop a fresh characterization of the nature of the social as a means of understanding global transformations By integrating abstract problems of social theory with empirical examples and political analysis *On Society* provides lucid interpretations of classical and contemporary social theory The book also critiques recent social theories that simply equate the demise of society with globalization the communications revolution or multiculturalism and in so doing provides an original insight into today s world

Battle Lines Eliza Richards, 2018-12-28 During the U S Civil War a combination of innovative technologies and catastrophic events stimulated the development of news media into a central cultural force

Reacting to the dramatic increases in news reportage and circulation poets responded to an urgent need to make their work immediately relevant to current events As poetry s compressed forms traveled more quickly and easily than stories novels or essays through ephemeral print media it moved alongside and engaged with news reports often taking on the task of imagining the mental states of readers on receiving accounts from the war front Newspaper and magazine poetry had long editorialized on political happenings Indian wars slavery and abolition prison reform women s rights but the unprecedented scope of what has been called the first modern war and the centrality of the issues involved for national futures generated a powerful sense of single mindedness among readers and writers that altered the terms of poetic expression In *Battle Lines* Eliza Richards charts the transformation of Civil War poetry arguing that it was fueled by a symbiotic relationship between the development of mass media networks and modern warfare Focusing primarily on the North Richards explores how poets working in this new environment mediated events via received literary traditions Collectively and with a remarkable consistency poems pulled out key features of events and drew on common tropes and practices to mythologize commemorate and ponder the consequences of distant battles The lines of communication reached outward through newspapers and magazines to writers such as Dickinson Whitman and Melville who drew their inspiration from their peers poetic practices and reconfigured them in ways that bear the traces of their engagements

The Light of Tabor David Bentley Hart,2025-09-01 In *The Light of Tabor* award winning theologian David Bentley Hart proposes an approach to the nature of Christ that is profoundly radical yet deeply classical For centuries Christian theology has rested on a paradox Beginning with the Council of Chalcedon in the fifth century the major Christian traditions have held that Jesus Christ combines two distinct natures he is fully God and somehow fully human Yet this tenet has traditionally invited irresolvable metaphysical contradictions David Bentley Hart delves deeply into the seemingly irresolvable tensions providing the first theological attempt to show how the logic of the earliest churches angelomorphic Christology is continuous with later Chalcedonian orthodoxy Hart draws on theologians from every epoch of Christian thought from Origen to Sergei Bulgakov while making free use of concepts from other spiritual traditions such as Vedanta *The Light of Tabor* proposes an approach to Christology that is thoroughly monistic both as regards Being and as regards nature Hart argues that the only coherent reading of the figure of Christ is one that fully embraces the essential unity of all things divine and natural through him proposing an approach to Christology that affirms classical doctrine without retaining the dualistic presuppositions that have haunted theology since the age of the great councils
