Data Mining And Knowledge Discovery For Geoscientists:

Data Mining and Knowledge Discovery for Geoscientists Guangren Shi, 2013-10-09 Currently there are major challenges in data mining applications in the geosciences This is due primarily to the fact that there is a wealth of available mining data amid an absence of the knowledge and expertise necessary to analyze and accurately interpret the same data Most geoscientists have no practical knowledge or experience using data mining techniques For the few that do they typically lack expertise in using data mining software and in selecting the most appropriate algorithms for a given application This leads to a paradoxical scenario of rich data but poor knowledge The true solution is to apply data mining techniques in geosciences databases and to modify these techniques for practical applications Authored by a global thought leader in data mining *Data Mining and Knowledge Discovery for Geoscientists* addresses these challenges by summarizing the latest developments in geosciences data mining and arming scientists with the ability to apply key concepts to effectively analyze and interpret vast amounts of critical information Focuses on 22 of data mining s most practical algorithms and popular application samples Features 36 case studies and end of chapter exercises unique to the geosciences to underscore key data mining applications Presents a practical and integrated system of data mining and knowledge discovery for geoscientists Rigorous yet broadly accessible to geoscientists engineers researchers and programmers in data mining Introduces widely used algorithms their basic principles and conditions of applications diverse case studies and suggests algorithms that may be suitable for specific applications *Encyclopedia of Mathematical Geosciences* B. S. Daya Sagar, Qiuming Cheng, Jennifer McKinley, Frits Agterberg, 2023-07-13 The *Encyclopedia of Mathematical Geosciences* is a complete and authoritative reference work It provides concise explanation on each term that is related to Mathematical Geosciences Over 300 international scientists each expert in their specialties have written around 350 separate articles on different topics of mathematical geosciences including contributions on Artificial Intelligence Big Data Compositional Data Analysis Geomathematics Geostatistics Geographical Information Science Mathematical Morphology Mathematical Petrology Multifractals Multiple Point Statistics Spatial Data Science Spatial Statistics and Stochastic Process Modeling Each topic incorporates cross referencing to related articles and also has its own reference list to lead the reader to essential articles within the published literature The entries are arranged alphabetically for easy access and the subject and author indices are comprehensive and extensive **Recent Advancement in Geoinformatics and Data Science** Xiaogang Ma, Matty Mookerjee, Leslie Hsu, Denise Hills, 2023-04-11 The chapters in this Special Paper present the latest progress and discoveries in both the methodology and technology of geoinformatics The methodologies technologies and best practices will make this volume a useful reference with long term impacts for data intensive geoscience in the next decade and beyond **Advanced Computing in Industrial Mathematics** Ivan Georgiev, Hristo Kostadinov, Elena Lilkova, 2025-07-01 This book gathers the peer reviewed proceedings of the 17th Annual Meeting of the Bulgarian Section of the Society for Industrial and Applied

Mathematics BGSIAM 22 held in Sofia Bulgaria The general theme of BGSIAM 22 was industrial and applied mathematics with particular focus on mathematical physics numerical analysis high performance computing optimization and control mathematical biology stochastic modeling machine learning digitization and imaging advanced computing in environmental biomedical and engineering applications

Geoinformatics A. Krishna Sinha, 2006-01-01 The science of informatics in the broadest sense has been several thousands of years in the making With the recent emergence of large storage devices and high speed processing of data it has become possible to organize vast amounts of data as digital products with ontologic tags and concepts for smart queries Coupling this computational capability with earth science data defines the emerging field of geoinformatics Since the science of geology was established several centuries ago observations led to conclusions that were integrative in concept and clearly had profound implications for the birth of geology As disciplinary information about Earth becomes more voluminous the use of geoinformatics will lead to integrative science based discoveries of new knowledge about planetary systems Twenty one research papers co authored by 96 researchers from both earth and computer sciences provide the first ever organized presentation of the science of informatics as it relates to geology Readers will readily recognize the vast intellectual content represented by these papers as they seek to address the core research goals of geoinformatics Publisher's website

Advances in Data Mining Knowledge Discovery and Applications Adem Karahoca, 2012-09-12 *Advances in Data Mining Knowledge Discovery and Applications* aims to help data miners researchers scholars and PhD students who wish to apply data mining techniques The primary contribution of this book is highlighting frontier fields and implementations of the knowledge discovery and data mining It seems to be same things are repeated again But in general same approach and techniques may help us in different fields and expertise areas This book presents knowledge discovery and data mining applications in two different sections As known that data mining covers areas of statistics machine learning data management and databases pattern recognition artificial intelligence and other areas In this book most of the areas are covered with different data mining applications The eighteen chapters have been classified in two parts Knowledge Discovery and Data Mining Applications

Geospatial Intelligence: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2019-03-01 Decision makers such as government officials need to better understand human activity in order to make informed decisions With the ability to measure and explore geographic space through the use of geospatial intelligence data sources including imagery and mapping data they are better able to measure factors affecting the human population As a broad field of study geospatial research has applications in a variety of fields including military science environmental science civil engineering and space exploration *Geospatial Intelligence Concepts Methodologies Tools and Applications* explores multidisciplinary applications of geographic information systems to describe assess and visually depict physical features and to gather data information and knowledge regarding human activity Highlighting a range of topics such as geovisualization spatial analysis and landscape mapping this

Earth Science Roy H. Williams, 2011-12-15 Earth science is a broad field of study that encompasses many different disciplines including meteorology climatology and geology The importance of the earth sciences in predicting weather and climate tracking pollution drilling for petroleum evaluating soil and monitoring ground water is paramount in modern society This new work covers a broad selection of topics including use of satellite remote sensing to track pollution and weather patterns monitoring for pre earthquake signals using earthquakes to uncover new information about the earth desalination of ground water predicting deforestation and much more

Handbook of Research on Swarm Intelligence in Engineering Bhattacharyya, Siddhartha, Dutta, Paramartha, 2015-04-30 Swarm Intelligence has recently emerged as a next generation methodology belonging to the class of evolutionary computing As a result scientists have been able to explain and understand real life processes and practices that previously remained unexplored The Handbook of Research on Swarm Intelligence in Engineering presents the latest research being conducted on diverse topics in intelligence technologies such as Swarm Intelligence Machine Intelligence Optical Engineering and Signal Processing with the goal of advancing knowledge and applications in this rapidly evolving field The enriched interdisciplinary contents of this book will be a subject of interest to the widest forum of faculties existing research communities and new research aspirants from a multitude of disciplines and trades

Machine Learning Techniques Applied to Geoscience Information System and Remote Sensing Hyung-Sup Jung, Saro Lee, 2019-09-03 As computer and space technologies have been developed geoscience information systems GIS and remote sensing RS technologies which deal with the geospatial information have been rapidly maturing Moreover over the last few decades machine learning techniques including artificial neural network ANN deep learning decision tree and support vector machine SVM have been successfully applied to geospatial science and engineering research fields The machine learning techniques have been widely applied to GIS and RS research fields and have recently produced valuable results in the areas of geoscience environment natural hazards and natural resources This book is a collection representing novel contributions detailing machine learning techniques as applied to geoscience information systems and remote sensing
