Chaos And Governance In The Modern World System Contradictions Of Modernity:

Chaos and Governance in the Modern World System Giovanni Arrighi, 1999 Adopting an historical approach explores four controversies facing global analyses today the geography of world power the power of states versus the power of capital the social power of subordinate groups and the changing balance of civilizational power **The Afterlives of Extraction**

, 2023-10-30 The frontiers of extraction are expanding rapidly driven by a growing demand for minerals and metals that is often motivated by sustainability considerations Two volumes of International Development Policy are dedicated to the paradoxes and futures of green extractivism with analyses of experiences from five continents In this the second of the two volumes the 22 authors using different conceptual approaches and in different empirical contexts demonstrate the alarming obduracy of the logic of extractivism even and perhaps especially in the growing support for the so called green transition The authors highlight the complex and enduring legacies of resource extraction and the urgent need to move beyond extractive models of development towards alternative pathways that prioritise social justice environmental sustainability democratic governance and the well being of both humans and non humans They also caution us against the assumption that anti extraction is anti extractivist that post extraction is post extractivism and they critically attune us to the systemic nature of extractivism in ways that both connect and transcend any particular site or scale This volume accompanies IDP 15 The Lives of Extraction Identities Communities and the Politics of Place **Hegemony and World Order** Piotr Dutkiewicz, Tom Casier, Jan Aart Scholte, 2020-09-23 Hegemony and World Order explores a key question for our tumultuous times of multiple global crises Does hegemony that is legitimated rule by dominant power have a role in ordering world politics of the twenty first century If so what form does that hegemony take does it lie with a leading state or with some other force How does contemporary world hegemony operate what tools does it use and what outcomes does it bring This volume addresses these questions by assembling perspectives from various regions across the world including Canada Central Asia China Europe India Russia and the USA The contributions in this book span diverse theoretical perspectives from realism to postcolonialism as well as multiple issue areas such as finance the Internet migration and warfare By exploring the role of non state actors transnational networks and norms this collection covers various standpoints and moves beyond traditional concepts of state based hierarches centred on material power The result is a wealth of novel insights on today s changing dynamics of world politics Hegemony and World Order is critical reading for policymakers and advanced students of International Relations Global Governance Development and International Political Economy The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY ND 4 0 license **Dying for Capitalism** Charles Derber, Suren Moodliar, 2023-07-24 This is an original accessible book for scholars students activists and the general public on the greatest crisis the world has faced The authors challenge the widespread notion that a green and peaceful set of technological reforms in the current economic and political system

perhaps a green capitalism can prevent disaster Dying for Capitalism analyzes the triangle of extinction that links capitalism environmental destruction and militarism as a system that cannot sustain life on the planet The authors analyze how the extinction triangle evolved historically how it functions globally as integral to the world capitalist order and how the United States has become the dominant extinction nation They also show how recent anti democratic and anti scientific cultural and political forces intensify denial of the threat and subordinate health and survival to profit and extreme concentrated power The book offers a slender path of social and political transformation that can prevent catastrophe The path requires moving beyond current ruling systems But possibilities of survival arise from action at local state regional and global levels through multiple strategies and movements that already exist The authors draw on the history of abolitionism and emancipation from slavery in the United States to show how a system that appears unchangeable can be transformed while describing organizations movements and practices that are models of hope and a shift from the triangle of extinction to the circle of creation

The Global City Saskia Sassen,2025-09-09 In her classic book *The Global City* Saskia Sassen tells how New York London and Tokyo became command centers of the emerging global economy and in the process underwent massive and parallel changes The book reorients the way we think about how cities shape and are shaped by globalization and provides lessons for the future

Cultural Studies Simon During,2005 An ideal introduction explaining the history and key concerns of cultural studies *Capital as Power* Jonathan Nitzan,Shimshon Bichler,2009-06-02 The book presents a radically new framework for understanding capital as a mode of power Challenging the liberal and Marxist approaches it articulates a new theory of accumulation develops new empirical methods of research and offers a new history of capitalism

Post-Colonial Globalisation Yonit Manor-Percival,Janet Dine,2023-09-22 With the globalist project immersed in conflicts and adversity Post Colonial Globalisation offers an insight into the actors who animate it and the power dynamics which run through it Using the law as the prism through which these are examined and fusing historical with contemporary perspectives the book contributes to understanding the crisis in which we find ourselves as a moment of both existential danger and an opportunity This book is in two parts The first part charts capitalism s historical progression to globalism through the lens of the act of taking Taking has risen to institutional prominence as a core concept in the legal lexicon of foreign investment protection to denote deprivation of private property Post Colonial Globalisation advances a broader notion of taking as a tool of social criticism From enclosures to colonial settlement to an empire of unequal exchanges to contemporary land grabs private property now so vigorously protected against taking was itself born out of taking The second part focuses on the ecological dimension of neoliberal globalisation and its hallmarks of unlimited growth and excessive extraction It has negatively impacted the climate the earth and its human and non human inhabitants to the point of putting their continued existence at risk Central to this is the deification of property Our understanding of proprietary relations and the rights they confer must be revisited if our interface with the planet is to be reconfigured The emerging

doctrine of rights of nature offers one route which may lead us in this direction The two parts complement each other One looks at taking by members of the human species from each other The other looks at taking by the human species from nature This book is aimed at anyone who wishes to gain insight into the current crisis including students academics NGOs and policymakers *Questions of Modernity* Timothy Mitchell,1994 In his introduction to this collection of essays by constitutional experts Philip Bryden says that Canadians can be proud of their commitment to the protection of rights and liberties in the Charter Canada he believes is a better place to live than it would be otherwise Nevertheless as the essays in this book reveal the case in favour of the Charter is not simple or one sided For instance Kim Campbell minister of justice at the time of writing and Jeffrey Simpson of the Globe and Mail express concern that the Charter promotes a rights discourse that threatens to overwhelm the ordinary politics of recognizing and accommodating different interests Dean Lynn Smith of the University of British Columbia law faculty observes that the Charter rights are better understood as complementing than as supplanting traditional mechanisms The authors diverse in background and outlook reflect varying points of view but share a significant degree of consensus on issues that need to be addressed Recovering Lost Footprints, Volume 1 Arturo Arias,2017-09-14 Recovering Lost Footprints is the first full length critical study to analyze Latin American Indigenous literary narratives in a systematic manner In the book Arturo Arias looks at Maya narratives in Guatemala The study of these works is intended to spark changes so that constitutions recognize these cultures their rights their languages their centers of worship and their cosmologies Through this study Arias problematizes the partial or full omission of Latin America s original inhabitants from recognized citizenry This book analyzes these elements of exclusion in the novelistic output of three salient figures Luis de Li n Gaspar Pedro Gonz lez and V ctor Montejo The works by these writers offer evidence that most native people have entered modernity without renouncing their respective cultures or the specifics of their singular identities The philosophical ethics elaborated in the texts such as respect for nature and recognition of the holistic value of natural beings enable non Indigenous readers to both understand and relate to these values
