Sustainable Retrofit and Facilities Management Paul Appleby, 2013-03-05 Governments across the globe are setting targets for reducing their carbon emissions For example the UK Government has committed to an eighty per cent reduction by 2050 when twenty eight million buildings that currently exist will still be standing this represents a challenge to improve the energy efficiency of more than one building per minute between now and 2050 This is a problem that needs tackling worldwide and is a challenge to both the

refurbishment sector of the global construction industry and to those who own and operate existing buildings Sustainable Retrofit and Facilities Management provides comprehensive guidance to those involved in the refurbishment and management of existing buildings on minimizing carbon emissions water consumption and waste to landfill along with enhancing the long term sustainability of a building Practical guidance is provided on measures that can be used to improve the efficiency and sustainability of existing buildings through both good management and refurbishment Also explored is the relationship between the refurbishment of existing buildings facility management and the wider community infrastructure The book looks at management tools such as post occupancy evaluation building health checks energy management software green building management toolkits and green leases Illustrated throughout with case studies and examples of best practice this is a must have handbook for engineers architects developers contractors and facility managers **Improving Energy Efficiency and Reducing Emissions through Intelligent Railway Station Buildings** Asian Development

Bank,2015-09-01 Buildings in the People s Republic of China PRC consume 21% of the total energy produced in the country This study analyzes and proposes feasible energy saving and emission reducing solutions for domestic railway stations in the PRC The use of intelligent building controls support reduction of energy consumption minimization or elimination of energy wastes and cost savings Strong institutional mechanisms and railway building management methods and policies also promote technological innovation Moreover these are necessary to balance the interests of multiple parties to be able to achieve energy efficiency in railway station buildings in the PRC **Handbook on Energy Efficiency in Buildings** Asian

Development Bank,2024-10-01 As Asia s building sector booms this handbook provides practical tools and guidance to design evaluate and finance energy efficient building projects to help make the sector greener and more resilient Explaining how energy efficient construction can help reduce costs lower emissions and improve affordability the handbook offers practical guidance and tools covers key project cycle stages and delves into sustainable heating and cooling strategies It details ways to improve procurement monitoring and evaluation of energy efficiency measures in the building sector while underscoring the need for governments and the private sector to work together to help transition toward a zero carbon building stock

Embodied Carbon for Sustainable Building Conservation Oriel Prizeman,2025-06-30 This timely volume provides the latest research guidance examples and methods for understanding calculating leveraging and reducing embodied carbon in building conservation In the context of climate change and increasing energy costs imperatives to replace or substantially modify older and historic buildings are rapidly accelerating The idea that a new or replacement building will perform better overlooks the embodied carbon of that which it replaces In effect the pressures of one conservation agenda that of energy efficiency threaten to eclipse another that of heritage The embodied carbon of existing buildings must be addressed if calculations of operational energy use are to be properly balanced In this book an international and multi disciplinary group of authors offer perspectives on the influence and implementation of strategies to account for embodied carbon for the

conservation of the historic environment Examples are deliberately diverse and extend beyond buildings to the valorisation of a heritage grassland landscape specifically because of its capacity to store carbon to the fundamental attributes of historic concrete and our responsibility to consider replacement with critical care This book inspires confidence in developing arguments by spreading examples globally and delivering plausible actual narratives alongside clear up to date guidance It brings together international standard setters with practitioners academics and advocates all clearly explained It also illustrates how embodied carbon played a pivotal role in seeking to determine the case of saving Marks and Spencer Oxford Street London from replacement This will be an essential resource for all building conservation and heritage practitioners including building surveyors architects conservators engineers conservation officers building archaeologists and consultants

Metric Handbook Pamela Buxton,2021-11-25 The Metric Handbook is the major handbook of planning and design data for architects and architecture students with over 100 000 copies sold to successive generations of architects and designers It remains the ideal starting point for any project and belongs in every design office The seventh edition references the latest regulations and construction standards and includes new chapters on data centres and logistics facilities alongside basic design data for all the major building types For each building type the book gives the basic design requirements and all the principal dimensional data and succinct guidance on how to use the information and what regulations the designer needs to be aware of As well as buildings the Metric Handbook deals with broader aspects of design such as materials acoustics and lighting and general design data on human dimensions and space requirements The Metric Handbook is the unique reference for solving everyday planning problems

Designing Zero Carbon Buildings Using Dynamic Simulation Methods
