Descriptive Writing - Show the children a picture of a circus scene on the left and get them to describe what they can see but then to think about what they might hear and what they might smell too. If you can get around explain the circus and get them to imagine they are actually at the circus. They could also pretend they are going through the tent at a circus and describe what they can see and hear.

Persuasion - Write a persuasive poster to get people to visit the circus. This could be for any circus or specially directed at a circus they have looked at in geography. The task can get them to think about animals that are made to work in the circus and to write a persuasive letter to the government to get better welfare animals in the circus rings.

Other writing persuasions could use this great [resource](#) to look at features of persuasive texts. You may also want to have this [page](#) on the web to research children what is needed in their writing.

Managerial report - An animal has escaped from the circus and a meeting the owners of the circus have. Get the children to write a managerial report on this, getting the opinions of the circus. Be realistic from the circus and what the audience and going to do about it. The [Resource](#) writing the children understand what makes a good managerial report and the [writing sheet](#) will ensure the children get all of their ideas down in an organized fashion.

Recapitulation - Get the children to come up with a new act for the circus and get them to write instructions on how to perform the act. They can use the [circus menu](#) to write and their instructions.

Science

Forces - Look at different circus performers and discuss what movements they do. Find a video to show the tricks of circus performers and show them examples of different forces. After showing them a few get them to try and point out some to you. Get the children to call different circus acts into pushes, pulls, twists and squashes and explain how to speed up or slow down the process.

Look at a springs water and investigate whether or not the pole they hold needs the same weight at each end of the pole to balance. Look at balanced forces. This can easily be done with wooden sticks balanced on a wall and putting unequal and equal weights on the ends of the sticks. Or it could be done with putting weights on a seesaw and getting it to balance.

Jugglers use balls in the circus so conduct this [experiment](#) on different surfaces and the effect it has on how far the ball rolls. Then get them to enter it up with the help of the [worksheet](#).

Look at gravity and the effect it has on some of the circus acts, for example the jugglers and the trapeze artists. Do an experiment with pendulums pretend they are the trapeze artists and look at the effect gravity has on the pendulum and how the mass of the pendulum affects the motion of itself.

Drama

Mime - Do some work with the class on doing mime. Look at a video of mime and get the children in groups to come up with their own routine.

PSHE

Have you? Have animals performing in the circus. Discuss whether or not it is right for animals to be part of a circus. Use any objects from long ago like a [rod](#).

Feedback - Is a circus ever going to work as a circus first of all to look and then to experience watching a show. Do some more looking and then to 'know the reality' what would the real going back and forth the circus to the other and any other aspects for the audience and discuss to be together in any other matter to look the feedback.

Geography

Look at an aerial shot of a circus and look at what you can see. Is it just the big top or are there other things in the shot? Get the children to create a circus in a box with the information they have collected from the world map. Get them to place their circus in a large piece of paper in water.

Choose around the world - Give the class an opportunity to research around the world, especially Europe, Asia, Africa. Get them to do a project on a country and place on the world. They could make a poster to advertise the circus from the country starting.

Travel - Look at how circus travel from place to place. Give the children different modes of transport and what if place they have to travel. Get them to work out how long it would take to get from place to place with each mode of transport. Can they get out on mode of transport? Or is they have to use multiple modes?

Art

Look at old-fashioned circus posters and recreate them. Paint each other's faces to look like clowns.
