Citizen Canine Our Evolving Relationship With Cats And Dogs:

Citizen Canine David Grimm, 2014-04-08 A pet lover and award winning journalist traces the history of cats and dogs and the changing social attitudes that transformed these furry creatures from pests and hunting tools in the middle ages to their current status as beloved family members 30 000 first printing *The Ethics of Canine Care* Craig Banks

Merow, 2023-06-14 The social status of dogs has changed dramatically in the past 75 years Today most dog owners and small animal veterinarians consider companion canines to be members of their families and communities However the attitudes of some dog owners concerning their responsibilities to their dogs and many of the laws that regulate dog ownership and veterinary medical practice largely reflect the human canine relationship and ethical norms of an earlier era This incongruity leads to unmet needs for companion canines and high levels of stress for many veterinary clinicians This book presents arguments for human responsibilities to companion canines a detailed analysis of what those responsibilities entail and the professional ethical standards and laws needed to ensure that responsibilities are met A new moral framework the Custodial Property Framework is created for the care and medical treatment of companion canines and is grounded in a detailed analysis of the responsibilities of care generated by the relationship we have with our best friends **War and Peace with the Beasts** Brian Griffith, 2020-09-01 The animals that one culture likes are often hated in the next and it seems that the animals themselves know it well Basically one culture s animal partner is often another culture s nightmare from hell Naturally I wonder how relations between people and animals got to be so different around the world How did it happen that some cultures treat bats snakes wolves or ravens as embodiments of evil while other people treat the same animals with affection or even reverence Our wars with the animals go way back Beyond the light cast by our prehistoric campfires the eyes glowing in the night seemed to represent a great hostile force As we began to cultivate crops and husband a few favoured animals we generally regarded other creatures as threats to our chosen few Using the logic of war we sought to maximize the populations of certain creatures and the destruction of others In the past that war effort was our great crusade for the advancement of civilization as we knew it The war had a frontier a front line and an ongoing battle on the home front Expanding outward from our various cradles of civilization we progressively tamed the forests and grasslands converting them to monocrop plantations or pastures Then we had to defend our monocrops from encroaching weeds insects and wild animals In this immediately engaging story and fact filled page turner of a book Brian Griffith looks at the range of ways we relate to animals and the stories we tell about them He asks how we choose whether buddyhood fearful respect businesslike predation or genocidal war is the most appropriate response to each species we meet He watches how our treatment of inferior beings affects our treatment of inferior people and traces some of the chain reactions we unleash when we try to weed out species we don t like Without much hope of making animals fit my personal preferences he writes I wonder how good our relations can get *Animals and Ourselves* Kathy Merlock Jackson, Kathy Shepherd Stolley, Lisa Lyon

Payne,2020-10-13 The relationship between humans and animals has always been strong symbiotic and complicated Animals real and fictional have been a mainstay in the arts and entertainment figuring prominently in literature film television social media and live performances Increasingly though people are anthropomorphizing animals assigning them humanoid roles tasks and identities At the same time humans such as members of the furry culture or college mascots find pleasure in adopting animal identities and characteristics This book is the first of its kind to explore these growing phenomena across media The contributors to this collection represent various disciplines to include the arts humanities social sciences and healthcare Their essays demonstrate the various ways that human and animal lives are intertwined and constantly evolving

Mourning Animals Margo DeMello, 2016-08-01 We live more intimately with nonhuman animals than ever before in history The change in the way we cohabitate with animals can be seen in the way we treat them when they die There is an almost infinite variety of ways to help us cope with the loss of our nonhuman friends from burial cremation and taxidermy to wearing or displaying the remains ashes fur or other parts of our deceased animals in jewelry tattoos or other artwork to counselors who specialize in helping people mourn pets to classes for veterinarians to tips to help the surviving animals who are grieving their animal friends to pet psychics and memorial websites But the reality is that these practices and related beliefs about animal souls or animal afterlife generally only extend with very few exceptions to certain kinds of animals pets Most animals in most cultures are not mourned and the question of an animal afterlife is not contemplated at all Mourning Animals investigates how we mourn animal deaths which animals are grievable and what the implications are for all animals
