A New Research Agenda for Improvements in Quality of Life Filomena Maggino, 2015-04-10 This book presents a new research agenda for improvements in Quality of Life research It includes topics such as Studying QoL in particular subpopulations and selected subgroups Disentangling the difficult task of identifying determinants of QoL Perfectionating the measurement of conceptual dimensions Defining new indicators able to measure and monitor particular social conditions and shows that these are not separated fields of studies but intersect each other and produce different outcomes which can be with difficulty classifiable consistent with the idea of the complexity of our reality The volume presents micro perspectives by taking into account the macro situation through both qualitative and quantitative approaches La città: bisogni, desideri, diritti. e digitale la diffusa comunicazione di massa insieme ai grandi mutamenti di natura economica finanziaria e di riequilibri geopolitici a livello globale impongono una rivisitazione del concetto di città e nuove visioni verso le politiche degli insediamenti di edilizia residenziale pubblica. Partendo da quanto già prodotto e realizzato negli ultimi decenni in Europa nel campo dell'edilizia residenziale pubblica, il presente lavoro pone quesiti ed opera riflessioni sullo stato attuale sulle problematiche emerse negli ultimi decenni. Cerca altresì possibili indirizzi di riqualificazione e recupero di parti urbane escluse dai processi di partecipazione attiva ed integrata della vita della città. Con il conforto del pensiero di Bauman, Chomsky, Levy e Fitoussi, si afferma inoltre che in un momento della storia dove i fattori economici sembrano gli unici a prevalere, bisogna far sì invece che l'uomo del Terzo millennio possa ancora sperare e credere in un futuro migliore, una casa migliore, una città migliore ed in un benessere per tutti, non solo fisico e materiale ma anche e soprattutto spirituale e morale.

The Dusk of Design Jose Antonio Lara-Hernandez, Alessandro Melis, Paola Boarin, Priscila Besen, 2025-01-13

The Dusk of Design explores the intersection of evolutionary theories and architectural design. Drawing inspiration from the concept of exaptation in biology, the book argues that natural selection as the most successful designer on our planet thrives on the diversity, variability, and redundancy of creative structures. By transferring these mechanisms to architectural design, the book contends that we can cultivate more resilient and sustainable architecture and cities in the face of environmental crises. This book seeks to illuminate the profound potential of multidisciplinary approaches by examining case studies from architecture worldwide. By exploring how evolutionary theories can explain various architectural phenomena, it aims to inspire architects, designers, researchers, and students to adopt a holistic and transdisciplinary approach to their work. The book provides a clear and concise overview of evolutionary principles, demonstrating their relevance to architecture. It will showcase a range of case studies that highlight the application of evolutionary theories in solving architectural challenges such as adaptive reuse, sustainable urban planning, and resilient design in the face of climate change. Ultimately, **The Dusk of Design** aims to bridge the gap between biology and architecture, presenting a fresh perspective on how we can create more innovative, sustainable, and resilient built environments.
