A Comparative History of the

Literary Draft in Europe Olga Beloborodova, Dirk Van Hulle, 2024-11-15 Literary drafts are a constant in literatures of all ages and linguistic areas and yet their role in writing processes in various traditions has seldom been the subject of systematic comparative scrutiny In 38 chapters written by leading experts in many different fields this book charts a comparative history of the literary draft in Europe and beyond It is organised according to eight categories of comparison distributed over the volume s two parts devoted respectively to Text i e the textual aspects of creative processes and Beyond Text i e aspects of creative processes that are not necessarily textual Across geographical temporal linguistic generic and media boundaries to name but a few this book uncovers idiosyncrasies and parallels in the surviving traces of human creativity while drawing the reader s attention to the materiality of literary drafts and the ephemerality of the writing process they capture

Genetic Criticism Dirk Van Hulle, 2022-02-24 In Genetic Criticism Dirk Van Hulle introduces the study of creative processes to an Anglophone audience As a method in the study of literary writing processes genetic criticism is also a reading strategy The idea behind this book is to introduce this strategy to a broader audience from interested readers and graduate students to early career researchers and literary critics In literary studies it is often obvious that a particular work somehow seems to hit a nerve but more challenging to pinpoint exactly why it works This book therefore starts from a clear basic assumption knowing how something was made can help us understand how and why it works This strategy is at the basis of many disciplines including art history By means of X ray technology or hyperspectral imaging it is possible to look at a painting as a multilayered object with not only spatial dimensions but also a temporal one This temporal dimension is the core of the reading strategy introduced in this book Note books marginalia manuscripts and typescripts even if one works with scans give a concrete dimension to literature which is a helpful reading strategy for many students On the one hand this involves concrete transferrable skills such as aspects of transcription and digital scholarly editing On the other hand it also involves more abstract theoretical issues relating to matters of authorship collaboration authority agency intention and intertextuality

Scholarly Digital Editions as Interfaces Roman Bleier, Martina Bürgermeister, Helmut W. Klug, Frederike Neuber, Gerlinde Schneider, 2018-11-15 Interfaces are important elements of digital scholarly editions as they allow and direct the interaction of users with the online content and they facilitate the access to and exchange of data and information Some interfaces are created for the human user GUI others for machine interaction and data exchange API Both aspects of interfaces and their roles in digital scholarly editing were discussed at a conference in 2016 organised by the Centre for Information Modelling at the University of Graz and the Digital Scholarly Editions Initial Training Network DiXiT This volume includes a range of papers presented at the conference that highlight the diverse views and approaches towards interfaces in the digital scholarly editing community
