Dead Heat Global Justice And Global Warming:

Dead Heat Tom Athanasiou, Paul Baer, 2011-01-04 Today's extreme weather events record breaking heat waves droughts and melting ice caps foreshadow an increasingly unstable and dire future Yet despite all the US government continues to reject the Kyoto Protocol to deny the catastrophic consequences of oil dependency and to define the politics of oil as the politics of US unilateralism domination and war Dead Heat argues that justice not rhetoric and aid but real developmental justice for the people of developing world is going to be necessary and surprisingly soon It argues more particularly that such a justice must involve a phased transition from the Kyoto Protocol to a new climate treaty based on equal human rights to emit greenhouse pollutants Dead Heat makes the case for climate justice but insists that justice and equity for all their manifold ethical and humanitarian attractions must also be seen as the most realistic of virtues It insists in other words that our limited environmental space will itself show that it is the dream of a business as usual future that is naive and utopian

Global Justice, Natural Resources, and Climate Change Megan Blomfield, 2019-05-16 To address climate change fairly many conflicting claims over natural resources must be balanced against one another This has long been obvious in the case of fossil fuels and greenhouse gas sinks including the atmosphere and forests but it is ever more apparent that responses to climate change also threaten to spur new competition over land and extractive resources This makes climate change an instance of a broader more enduring and for many all too familiar problem the problem of human conflict over how the natural world should be cared for protected shared used and managed This work develops a new theory of global egalitarianism concerning natural resources rejecting both permanent sovereignty and equal division which is then used to examine the problem of climate change It formulates principles of resource right designed to protect the ability of all human beings to satisfy their basic needs as members of self determining political communities where it is understood that the genuine exercise of collective self determination is not possible from a position of significant disadvantage in global wealth and power relations These principles are used to address the question of where to set the ceiling on future greenhouse gas emissions and how to share the resulting emissions budget in the face of conflicting claims to fossil fuels climate sinks and land It is also used to defend an unorthodox understanding of responsibility for climate change as a problem of global justice based on its provenance in historical injustice concerning natural resources

On Global Justice Mathias Risse, 2012-09-16 The grounds of justice Un pouvoir ordinaire shared membership in a state as a ground of Justice Internationalism versus statism and globalism contemporary debates What follows from our common humanity the institutional stance human rights and nonrelationism Hugo Grotius revisited collective ownership of the Earth and global public reason Our sole habitation a contemporary approach to collective ownership of the earth Toward a contingent derivation of human rights Proportionate use immigration and original ownership of the Earth But the earth abideth for ever obligations to future generations Climate change and ownership of the atmosphere Human rights as membership rights in the global order Arguing for human rights

essential pharmaceuticals Arguing for human rights labor rights as human rights Justice and trade The way we live now Imagine there s no countries a reply to John Lennon Justice and accountability the state Justice and accountability the World Trade Organization Global Justice and Neoliberal Environmental Governance Chukwumerije Okereke,2007-09-03 An ethical critique of existing approaches to sustainable development and international environmental cooperation this book details the tensions normative shifts and contradictions that currently characterize it **Climate Change and Justice** Jeremy Moss,2015-11-13 This collection sheds new light on the key ethical issues of climate change justice *A Climate for Change* Katharine Hayhoe,Andrew Farley,2009-10-29 Most Christian lifestyle or environmental books focus on how to live in a sustainable and conservational manner A CLIMATE FOR CHANGE shows why Christians should be living that way and the consequences of doing so Drawing on the two authors experiences one as an internationally recognized climate scientist and the other as an evangelical leader of a growing church this book explains the science underlying global warming the impact that human activities have on it and how our Christian faith should play a significant role in guiding our opinions and actions on this important issue **Encyclopedia of Activism and Social Justice** Gary L. Anderson,Kathryn G. Herr,2007-04-13 This is an important historical period in which to develop communication models aimed at creating opportunities for citizens to find a voice for new experiences and social concerns Such basic social problems as inequality poverty and discrimination pose a constant challenge to policies that serve the health and income needs of children families people with disabilities and the elderly Important changes both in individual values and civic life are occurring in the United States and in many other nations Recent trends such as the globalization of commerce and consumer values the speed and personalization of communication technologies and an economic realignment of industrial and information based economies are often regarded as negative Yet there are many signs from the WTO experience in Seattle to the rise of global activism aimed at making biotechnology accountable that new forms of citizenship politics and public engagement are emerging The Encyclopedia of Activism and Social Justice presents a comprehensive overview of the field with topics of varying dimensions breadth and length This three volume Encyclopedia is designed for readers to understand the topics concepts and ideas that motivate and shape the fields of activism civil engagement and social justice and includes biographies of the major thinkers and leaders who have influenced and continue to influence the study of activism Key Features Offers multidisciplinary perspectives with contributions from the fields of education communication studies political science leadership studies social work social welfare environmental studies health care social psychology and sociology Provides an easily recognizable approach to topics ideas persons and concepts based on alphabetical and biographical listings in civil engagement social justice and activism Addresses both small scale social justice concepts and more large scale issues Includes biography pieces indicating the concepts ideas or legacies of individuals and groups who have influenced current practice and thinking such as John Stuart Mill Rachel Carson Mother Jones Martin Luther King Jr Karl Marx Mohandas Gandhi Nelson and Winnie Mandela Dorothy

Day and Thomas Merton **The Ethics of Climate Governance** Aaron Maltais, Catriona McKinnon, 2015-09-03 The ethics of climate governance is of critical importance to current debates in climate justice yet until now it has been largely neglected This book explores the ethical dimensions of bringing the threat of global warming under effective political control It addresses problems of domination and vulnerability in international climate negotiations democratic legitimacy and equity in climate governance strategies for dealing with gridlock in climate governance and new problems of governance raised by the technologies of geoengineering and biomass incineration This hugely important and timely collection of essays showcases the latest work by established and the best emerging scholars in this field striking out in a new direction in the climate justice debate *Climate Change* A Barrie Pittock, 2009-03-31 It is widely accepted in the scientific community that climate change is a reality and that changes are happening with increasing rapidity In this second edition leading climate researcher Barrie Pittock revisits the effects that global warming is having on our planet in light of ever evolving scientific research Presenting all sides of the arguments about the science and possible remedies Pittock examines the latest analyses of climate change such as new and alarming observations regarding Arctic sea ice the recently published IPCC Fourth Assessment Report and the policies of the new Australian Government and how they affect the implementation of climate change initiatives New material focuses on massive investments in large scale renewables such as the kind being taken up in California as well as many smaller scale activities in individual homes and businesses which are being driven by both regulatory and market mechanisms The book includes extensive endnotes with links to ongoing and updated information as well as some new illustrations While the message is clear that climate change is here and in some areas might already be having disastrous effects there is still hope for the future and the ideas presented here will inspire people to take action *Climate Change The Science Impacts and Solutions* is an important reference for students in environmental or social sciences policy makers and people who are genuinely concerned about the future of our environment *Global Environmental Change and Human Security* Richard A. Matthew, Jon Barnett, Bryan McDonald, Karen L. O'Brien, 2009-10-09 Experts discuss the risks global environmental change poses for the human security including disaster and disease violence and increasing inequity In recent years scholars in international relations and other fields have begun to conceive of security more broadly moving away from a state centered concept of national security toward the idea of human security which emphasizes the individual and human well being Viewing global environmental change through the lens of human security connects such problems as melting ice caps and carbon emissions to poverty vulnerability equity and conflict This book examines the complex social health and economic consequences of environmental change across the globe In chapters that are both academically rigorous and policy relevant the book discusses the connections of global environmental change to urban poverty natural disasters with a case study of Hurricane Katrina violent conflict with a study of the decade long Nepalese civil war population gender and development The book makes clear the inadequacy of traditional understandings of security

and shows how global environmental change is raising new unavoidable questions of human insecurity conflict cooperation and sustainable development Contributors W Neil Adger Jennifer Bailey Jon Barnett Victoria Basolo Hans Georg Bohle Mike Brklacich May Chazan Chris Cocklin Geoffrey D Dabelko Indra de Soysa Heather Goldsworthy Betsy Hartmann Robin M Leichenko Laura Little Alexander Lopez Richard A Matthew Bryan McDonald Eric Neumayer Kwasi Nsiah Gyabaah Karen L O'Brien Marvin Soroos Bishnu Raj Upreti
