The book looks at the impact of automation and explains that while some people may feel that the use of robotics and computers will threaten welders' jobs, in fact robots and computers will help welders, not replace them. At present welders are in demand and companies are faced with difficulties in recruiting and retaining good staff. It is through improved working conditions, which are presently often environmentally unsafe, with workers exposed to smoke, noise, vibration and heavy physical labour, that companies can attract and keep workers. The book emphasises the importance of managing human resources and looks at new ways of doing this. A recognition of the importance of managing human resources and looks at new ways of doing this.
