De Rationele Stad Van Bouwblok Tot Wooneenheid:

Bouwblokkenboek Katrijn Apostel, Dirk Janssen, Filip Pittillion (eds), 2008 **The Architecture Annual 2006-2007. Delft University of Technology**, 2008 The themes of this Architecture Annual focuses on how the materials design construction and running of a building can affect the environment De Rationele stad Jean Castex, Jean-Charles Depaule, Philippe R. Panerai, Henk Engel, 1984 Gedetailleerde kritische op de praktijk van bewoning afgestemde studie over een aantal tussen 1850 en 1950 tot stand gekomen projecten van stadsuitbreiding in Europese steden Urbanism Nikki Brand, 2009 This book is a collection of recent PhD papers from the Department of Urbanism TU Delft Urbanism is the academic discipline concerned with understanding the spatial organisation and dynamics of urban areas The quality of the urban environment is a determining factor in the social economic and environmental performance of societies and the life of citizens The TU Delft Department of Urbanism seeks to influence the processes of urban change and transformation through explicit design and planning interventions underpinning practical action to shape the urban environment in a sustainable way The strong tradition of urbanism in the delta of the Netherlands is a strong factor influencing this major contribution to knowledge and education in the field Further developments which build on this experience are necessary to address the great challenges of sustainable development not least with regard to the problems of climate change in delta areas transformation of brownfield sites and the making of high quality public space Of interest to all those committed to building a better urban environment some of the topics covered in this book include adaptive environments for human habitats searching for good urban form mixed use index MXI as a tool for urban planning and analysis and pattern formation in planned urban peripheries IOS Press is an international science technical and medical publisher of high quality books for academics scientists and professionals in all fields Some of the areas we publish in Biomedicine Oncology Artificial intelligence Databases and information systems Maritime engineering Nanotechnology Geoengineering All aspects of physics E governance E commerce The knowledge economy Urban studies Arms control Understanding and responding to terrorism Medical informatics Computer Sciences **The Sustainable City IX** N. Marchettini, C.A. Brebbia, R. Pulselli, S. Bastianoni, 2014-09-23 Containing the proceedings of the 9th International Conference on Urban Regeneration and Sustainability this book addresses the multi disciplinary aspects of urban planning a result of the increasing size of cities the amount of resources and services required and the complexity of modern society Most of earth's population now lives in cities and the process of urbanisation still continues generating many problems deriving from the drift of the population towards them These problems can be resolved by cities becoming efficient habitats saving resources in a way that improves the quality and standard of living The process however faces a number of major challenges related to reducing pollution improving main transportation and infrastructure systems New urban solutions are required to optimise the use of space and energy resources leading to improvements in the environment i.e. reduction in air water and soil pollution as well as efficient

ways to deal with waste generation These challenges contribute to the development of social and economic imbalances and require the development of new solutions Large cities are probably the most complex mechanisms to manage However despite such complexity they represent a fertile ground for architects engineers city planners social and political scientists and other professionals able to conceive new ideas and time them according to technological advances and human requirements The challenge of planning sustainable cities lies in considering their dynamics the exchange of energy and matter and the function and maintenance of ordered structures directly or indirectly supplied and maintained by natural systems Topics covered include Urban strategies Planning development and management Urban conservation and regeneration The community and the city Eco town planning Landscape planning and design Environmental management Sustainable energy and the city Transportation Quality of life Waterfront development Case studies Architectural issues Cultural heritage issues Intelligent environment and emerging technologies Planning for risk Disaster and emergency response Safety and security Waste management Infrastructure and society Urban metabolism **New Urban**

Configurations Nicola Marzot, Meta Berghauser Pont, 2014-04-15 Urban areas have been caught up in a turbulent process of transformation over the past 50 years and changes have been rapid with issues such as mobility nature water management energy use and public space featuring prominently In each Olympic year since 1988 the Faculty of Architecture at Delft University of Technology has held an international conference focusing on the connection between research and design exploring the field of tension between science technology and art This book presents the proceedings of the latest in this series of conferences New Urban Configurations held in Delft the Netherlands in October 2012 in collaboration with the European Association for Architectural Education EAAE and the International Seminar on Urban Form ISUF This edition of the conference discussed the role and critical potential of the architectural project in the transformation process of cities and territories that leads to new urban configurations The publication contains all 140 accepted papers and a selection of the keynote lectures presented at the conference The papers have been grouped into five main themes innovation in building typology infrastructure and the city complex urban projects green spaces and delta urbanism Four of these major topics are further divided into several subtopics This book will be of interest to everyone involved in designing building thinking about as well as managing the urban landscape and territory Zakboek voor de woonomgeving Willemijn Wilms Floet, Esther Gramsbergen, 2001 Dit inspiratieboek toont vierentwintig verrassend frisse woningbouwprojecten uit de rijke Nederlandse woningbouwtraditie Naast de totstandkoming en de exploitatiegeschiedenis is elk project gedocumenteerd met foto's en tekeningen van de stedenbouwkundige context woningplattegronden doorsneden gevelaanzichten en kengetallen Acht verschillende woonomgevingen waaronder villawijken tuinsteden vrijstaande woongebouwen en stedelijke hoven zijn vertegenwoordigd met projecten uit de woningwet middenstand en vrije sector Het mijnwerkersbuurtje Leenhof in Heerlen Parkflat Marlot in Den Haag en de residentie Wolvenschans in Leek zijn slechts enkele voorbeelden **Architecture of**
