De Volkskrant Stijlboek:

De Volkskrant Stijlboek / druk 4 Henk van Gessel, J.K. Hulsbosch, H. Huurdeman, 2006 Vraagbaak voor een correct gebruik van de Nederlandse taal vooral bedoeld voor professionele taalgebruikers zoals journalisten editie conform de witte spelling *Het stijlboek van de Volkskrant* Volkskrant, De (Amsterdam), 1986 *The dynamics of feminisation* Natalie Verelst, 2025-08-14 In this book feminisation the marking of female sex on personal nouns in Dutch and German is investigated contrastively diachronically and corpus linguistically The corpus based approach entails a theoretical and methodological shift from a structuralist and essentialist approach to the interplay of language and sex to a poststructuralist usage based and holistic perspective which has long been lacking from the scientific domain of Gender Linguistics Starting from the observation that feminising morphology seems less frequently used in Dutch than in German in the same contexts the goal is to examine how intra and extralinguistic factors influence the choice for or against the use of these morphological patterns These only partly consciously made choices are called differentiation and neutralisation respectively On the intralinguistic level the link between the use of feminising morphology and properties of the grammatical gender system is investigated contrastively and diachronically as well as more generally various semantic and pragmatic factors semantics of the personal noun animacy referentiality that may contribute to a more or less stable feminisation system On the extralinguistic level the effect of diverging views on gender fair language use in both language areas and within the respective areas North vs South for Dutch East vs West for German stands out Drawing on diachronic corpus data the effects of these factors are investigated empirically in three case studies by focusing on the form Case Study I and function Case Study II feminisation in human reference and Case Study III feminisation in nonhuman reference of feminising morphology Both formally and functionally Dutch feminisation is a complex system whereas the German one is more uniform and straightforward The use of feminising morphology in Dutch has been restricted since at least the second half of the 20th century but less so in Northern than in Southern Belgian Dutch By contrast the tendency in German goes toward the consolidation of the feminisation system in all semantically female contexts with the exception of language use in former East German newspapers Furthermore as opposed to the Dutch feminisation system the German system has taken on inflectional properties known as inherent inflection the marking of which is semantically motivated Examples of the use of feminising morphology in nonhuman reference fit in this analysis as well e.g. *die Partei als Gewinnerin* the party as the winner fem Significant impacting factors in the reduction of a feminisation system are indeed the gender system feminisation is connected with a preserved masculine feminine gender distinction present in German but not in Dutch referentiality feminisation is an important referent tracking instrument and therefore more likely found in referential contexts semantics in the case of reduction of feminisation remnants of the system are observed in semantic contexts which foreground social gender the newness of a personal noun in a language neutralisation of new nouns is more common than neutralisation of long

established nouns and the influence of language policy the Dutch feminisation system as well as the use of feminising morphology in the former GDR has been subject to a significant effect of conscious neutralisation strategies as a means of gender fair language use **Syntax of Dutch: Nouns and Noun Phrases - Volume 2** Hans Broekhuis, Marcel

Dikken, 2025-10-01 The Syntax of Dutch will be published in at least seven volumes in the period 2012 2016 and aims at presenting a synthesis of the currently available syntactic knowledge of Dutch It is primarily concerned with language description and not with linguistic theory and provides support to all researchers interested in matters relating to the syntax of Dutch including advanced students of language and linguistics The two volumes Nouns and Noun Phrases discuss the internal make up as well as the distribution of noun phrases Topics that will be covered include complementation and modification of noun phrases properties of determiners article demonstratives numeral and quantifiers the use of noun phrases as arguments predicates and adverbial modifiers **Genre in Language, Discourse and Cognition** Ninke

Stukker, Wilbert Spooren, Gerard Steen, 2016-05-10 The study of genre is scattered across research disciplines This volume offers an integrative perspective starting from the assumption that genres are cognitive constructs recognized maintained and employed by members of a given discourse community Its central questions are What does genre knowledge consist of How is it organized in cognition How is it applied in discourse production and interpretation How is it reflected in language use **Gender Across Languages** Marlis Hellinger, Hadumod Bußmann, 2002-04-10 This is the second of a three volume

comprehensive reference work on Gender across Languages which provides systematic descriptions of various categories of gender grammatical lexical referential social in 30 languages of diverse genetic typological and socio cultural backgrounds Among the issues discussed for each language are the following What are the structural properties of the language that have an impact on the relations between language and gender What are the consequences for areas such as agreement pronominalisation and word formation How is specification of and abstraction from referential gender achieved in a language Is empirical evidence available for the assumption that masculine male expressions are interpreted as generics Can tendencies of variation and change be observed and have alternatives been proposed for a more equal linguistic treatment of women and men This volume and the previous two volumes will provide the much needed basis for explicitly comparative analyses of gender across languages All chapters are original contributions and follow a common general outline developed by the editors The book contains rich bibliographical and indexical material Languages of Volume 2 Chinese Dutch Finnish Hindi Icelandic Italian Norwegian Spanish Vietnamese Welsh **Het stijlboek van de Volkskrant** ,1986 **Onze taal**
